Margaret A. McLaren

Women In Labor Women In Labor:

Women in Labor Allison L. Hepler, 2000 Early in the twentieth century states and courts began limiting the workplace hours of wage earning women in order to protect them from fatigue and ill health It was felt that a woman's role was to be a mother and that working too many hours in an often unhealthy and dangerous workplace created risks to the performance of that task In the 1970s many Fortune 500 companies began implementing fetal protection policies to prohibit women from working in areas deemed risky to reproductive capacity Again assumptions about motherhood were the driving force behind employment regulations *Women in Labor* examines how gender norms affected the workplace health of men and women Did the desire to protect women result in a safer workplace for all workers Did it advance or hinder the status of women in the work place In answering these questions Hepler describes a complex network of medical experts state bureaucrats business owners social reformers industrial engineers workers and feminists many with overlapping interests and identities This overlap often resulted in tradeoffs and unintended consequences For instance efforts promoting gender equality sometimes created equal risks for workers whereas emphasizing social realities resulted in job discrimination Reformists efforts to promote the important connection between the home and the industrial environment also allowed an employer to shirk responsibility for worker health The issue of women in the workplace will remain crucial in the twenty first century as workers worldwide struggle to create safer workplaces without sacrificing socioeconomic benefits or the health of women and their children

Ingredients for Women's Employment Policy Christine E. Bose, Glenna D. Spitze, 1987-04-01 *Ingredients for Women's Employment Policy* gathers together the ideas of sociologists and economists including both quantitative and qualitative research Basic descriptive data gathered over the last ten to fifteen years of labor force research and affirmative action legislation indicates high rates of occupational segregation continuing gender differentials in earnings and inequitable divisions of household labor This book represents an important reassessment of the complex mechanisms through which labor markets are transformed and investigates the issue of whether there has been any real progress in eradicating inequality Each chapter assesses the likely effects of alternative policy strategies in women's employment

The Other Women's Movement Dorothy Sue Cobble, 2005-08-21 American feminism has always been about more than the struggle for individual rights and equal treatment under the law In this book the author retrieves an alternative tradition of women's reform that sought answers to questions increasingly pressing today how to balance work and family and how to address growing economic inequalities This book traces the history of American social justice feminism from the 1930s into the present and to link that continuous tradition with the leadership of labor women Back cover *Women's Activism, Feminism, and Social Justice* Margaret A. McLaren, 2019 A wide range of issues besieges women globally including economic exploitation sexist oppression racial ethnic and caste oppression and cultural imperialism This book builds a feminist social justice framework from practices of women's activism in India to understand and work to overcome these injustices The

feminist social justice framework provides an alternative to mainstream philosophical frameworks that promote global gender justice for example universal human rights economic projects such as microfinance and cosmopolitanism McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo liberalism Arguing that these frameworks emphasize individualism over interdependence similarity over diversity and individual success over collective capacity McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism Relational cosmopolitanism prioritizes our connections while crucially acknowledging the reality of power differences Extending Iris Young s theory of political responsibility McLaren shows how Fair Trade connects to the economic solidarity movement The Self Employed Women s Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice The book is a rallying call for a shift in our thinking and practice towards re imagining the possibilities for justice from a relational framework from independence to interdependence from identity to intersectionality and from interest to socio political imagination

Admission to American Trade Unions French Eugene Wolfe,1912 Globalization and Militarism Cynthia Enloe,2016-03-02 Militarism is being globalized today not only in war zones such as Ukraine and Syria but in peaceful arenas such as families and football stadiums Ideas and practices of masculinities and femininities are fuel for this global militarization Who is presumed to be weak and who tough Who is the protector who the grateful protected Written by one of the world s leading feminist scholars this masterful and provocative newly updated edition tracks how women s desires to be patriotic yet feminine and men s fears of being feminized each have been exploited to globalize militarism and thus what it will take to roll back militarization anywhere Here are explorations of how governments shrink the meaning of national security how Nike and Adidas rely on militaries to keep women workers wages low how ideas about feminization were used to humiliate male prisoners in Abu Ghraib and of why camo became a fashion statement Cynthia Enloe offers readers a practical gender analysis tool kit with which to expose militarism s blatant and subtle workings Focusing her lens on the big picture of international politics and on the not so small picture of women s and men s complex everyday lives Enloe challenges us to chart militarism in all its forms in this updated edition
