## **Wonder And Wisdom Conversations In Science Spirituality And Theology:**

**Wonder and Wisdom** Celia Deane-Drummond, 2006 What has wonder that apparently innocent feeling of amazement so common in little children to do with wisdom often thought to be the privilege of those who are old What has theology and religious experience to do with scientific investigation of the natural world Professor Celia Deane Drummond's exploration of these themes expands the dialogue between science and religion She begins her study with reflections on the emotion of wonder tracing the history of its meaning from its Indo European roots to the present focusing on the experience of the natural world including that described by contemporary cosmology Incorporating insights from both Eastern and Western religious traditions as well as African spirituality she segues to a discussion of wisdom She considers natural wisdom looking at evolutionary convergence and design in the natural world and how it might mesh with theological understanding of natural wisdom human identity and the notion of God as wisdom She also discusses the origin of the cosmos and the role of God as creator as well as whether there is wisdom in nature and what the role if any of neuroscience in wisdom as a facet of human nature might be Returning to the theme of wonder she muses on wonder as it relates to the wisdom of God and the wisdom of the cross She shows that by weaving wonder and wisdom together a deeper spirituality can surface that integrates theology and science If wisdom is the voice for theology at the boundary of science so wonder reminds theology that science too offers its own wisdom that needs to be taken into account she concludes *Wonder and Wisdom* Celia Deane-Drummond, 2006
