Practice and review the concepts presented in Merrill's Atlas. This popular workbook set includes anatomy labeling exercises, positioning exercises, self tests, and an answer key. Types of exercises include matching, labeling, and identifying anatomy, short answer, and multiple choice questions, crosswords, true/false, fill in the blank, identifying structures on radiographs, and identifying proper patient positioning. A must have for radiography students. Exercises correspond to chapters in Merrill's Atlas, providing strong support for teaching and learning. Essential projections are those most frequently performed and determined to be necessary knowledge for entry level competency. Anatomy and positioning exercises provide balanced coverage of both topics. Film evaluation exercises include radiographs with accompanying questions on why an image is inadequate, leading to fewer repeat exams in the practice environment. A wide variety of review exercises are used to cover different kinds of information. An abundance of labeling exercises include about 600 illustrations for labeling practice, ensuring that students recognize anatomical structures on actual radiographs, not just on line drawings. Comprehensive self tests end each chapter so that students can accurately gauge their comprehension of the material and measure their own progress. Pathology exercises help radiographers understand which projections will best demonstrate various pathologies. Additional exercises covering all chapters in Merrill's Atlas Volumes 1 and 2 and some in Volume 3 including Compensating Filters, Geriatric and Pediatric Radiography, Mobile Radiography, Surgical Radiography, Computed Tomography. Exercises to review abbreviations.
