Information Technology in Business Davis, Charles K., 2003-01-31 From the macro management level to the micro

business detail information technology IT is essential to modern business success and necessitates a new kind of knowledge application IT evaluation This academic analysis covers IT evaluation strategies for measuring its impact on individuals organizations and small mid size and large businesses Covered are the Technology Acceptance Model TAM software measurement frameworks the balanced scorecard and project management

On the Move to Meaningful Internet Systems: OTM 2009 Robert Meersman, Tharam Dillon, Pilar Herrero, 2009-11-06 Internet based information systems the second covering the large scale integration of heterogeneous computing systems and data resources with the aim of providing a global computing space Each of these four conferences encourages researchers to treat their respective topics within a framework that incorporates jointly a theory b conceptual design and development and c applications in particular case studies and industrial solutions Following and expanding the model created in 2003 we again solicited and selected quality workshop proposals to complement the more archival nature of the main conferences with research results in a number of selected and more avant garde areas related to the general topic of Web based distributed computing For instance the so called Semantic Web has given rise to several novel research areas combining linguistics information systems technology and artificial intelligence such as the modeling of legal regulatory systems and the ubiquitous nature of their usage We were glad to see that ten of our earlier successful workshops ADI CAMS EI2N SWWS ORM OnToContent MONET SEMELS COMBEK IWSSA re appeared in 2008 with a second third or even fifth edition sometimes by alliance with other newly emerging workshops and that no fewer than three brand new independent workshops could be selected from proposals and hosted ISDE ODIS and Beyond SAWSDL Workshop diences productively mingled with each other and with those of the main conferences and there was considerable overlap in authors

Conceptual Modeling - ER 2005 Christian Kop, Heinrich C. Mayr, John Mylopoulos, Oscar Pastor, 2005-11-15 Conceptual modeling is fundamental to any domain where one must cope with complex real world situations and systems because it fosters communication between technology experts and those who would benefit from the application of those technologies Conceptual modeling is the key mechanism for understanding and representing the domains of information system and database engineering but also increasingly for other domains including the new virtual environments and the information system that support them The importance of conceptual modeling in software engineering is evidenced by recent interest in model driven architecture and extreme non programming Conceptual modeling also plays a prominent role in various technical disciplines and in the social sciences The Annual International Conference on Conceptual Modeling referred to as the ER Conference provides a central forum for presenting and discussing current research and applications in which conceptual modeling is the major emphasis In keeping with this tradition ER 2005 the 24th ER Conference spanned the spectrum of conceptual modeling including research and practice in areas such as theories of concepts and ontologies underlying conceptual modeling methods and tools for developing and communicating conceptual models and techniques for transforming conceptual models into effective information system implementations Moreover new

areas of conceptual modeling including Semantic Web services and the interdependencies of conceptual modeling with knowledge based logical and linguistic theories and approaches were also addressed *Research Directions in Data and Applications Security* Ehud Gudes, Sujeet Sheno, 2013-03-19 *Research Directions in Data and Applications Security* describes original research results and innovative practical developments all focused on maintaining security and privacy in database systems and applications that pervade cyberspace The areas of coverage include Role Based Access Control Database Security XML Security Data Mining and Inference Multimedia System Security Network Security Public Key Infrastructure Formal Methods and Protocols Security and Privacy **Strategic Software Engineering** Fadi P. Deek, James A. M. McHugh, Osama M. Eljabiri, 2005-05-26 The pervasiveness of software in business makes it crucial that software engineers and developers understand how software development impacts an entire organization *Strategic Software Engineering An Interdisciplinary Approach* presents software engineering as a strategic business oriented interdisciplinary endeavor rather than simply a technical *Architectural Issues of Web-enabled Electronic Business* V. K. Murthy, 2002-01-01 Web technologies play a critical role in today's web enabled e Business A key to success in applying the web based technologies to the real world problems lies in understanding the architectural issues and developing the appropriate methodologies and tools for designing e Business systems The main purpose of *Architectural Issues of Web Enabled Electronic Business* therefore is to provide e Business professionals a holistic perspective of this field that covers a wide range of topics

Global Implications of Modern Enterprise Information Systems: Technologies and Applications Gunasekaran, Angappa, 2008-12-31 This book presents useful strategies techniques and tools for the successful design development and implementation of enterprise information systems Provided by publisher **Applications and Innovations in Intelligent Systems X** Ann Macintosh, Richard Ellis, Frans Coenen, 2012-12-06 The papers in this volume are the referred Applications papers presented at ES 2002 the Twenty second SGES international Conference on Knowledge Based Systems and Applied Artificial Intelligence to be held in Cambridge during December 2002 The Application stream is the largest annual showcase in Europe of real applications using AI technology Papers presented in this volume describe the application of AI to address real world problems including commerce manufacturing and defence and every major AI technique and highlight critical areas of success and failure and present the benefits and lessons of value to other developers This is the tenth volume in the *Applications and Innovations in Intelligent Systems* series The series serves as a key reference as to how AI technology has enabled organisations to solve complex problems and gain significant business benefits The Technical Stream papers are published as a companion volume under the title *Research and Development in Intelligent Systems XIX Business Process Management Workshops* Michael zur Muehlen, Jianwen Su, 2011-05-16 This book constitutes the thoroughly refereed post workshop proceedings of nine international workshops held in Hoboken NJ USA in conjunction with the 8th International Conference on Business Process Management BPM 2010 in September 2010 The nine workshops focused on Reuse in

Business Process Management rBPM 2010 Business Process Management and Sustainability SusBPM 2010 Business Process Design BPD 2010 Business Process Intelligence BPI 2010 Cross Enterprise Collaboration People and Work CEC PAW 2010 Process in the Large IW PL 2010 Business Process Management and Social Software BPMS2 2010 Event Driven Business Process Management edBPM 2010 and Traceability and Compliance of Semi Structured Processes TC4SP 2010 In addition three papers from the special track on Advances in Business Process Education are also included in this volume The overall 66 revised full papers presented were carefully reviewed and selected from 143 submissions On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari, Douglas C. Schmidt, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara, Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i.e. around 1 paper out of every 4-5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees

Planning, Scheduling and Constraint Satisfaction Luis Castillo, 2005 Bringing artificial intelligence planning and scheduling applications into the real world is a hard task that is receiving more attention every day by researchers and practitioners from many fields In many cases it requires the integration of several underlying techniques like planning scheduling constraint satisfaction mixed initiative planning and scheduling temporal reasoning knowledge representation formal models and languages and technological issues Most papers included in this book are clear examples on how to integrate several of these techniques Furthermore the book also covers many interesting approaches in application areas ranging from industrial job shop to electronic tourism environmental problems virtual teaching or space missions This book also provides powerful techniques that allow to build fully deployable applications to solve real problems and an updated review of many of the most interesting areas of application of these technologies showing how powerful these technologies are to overcome the expressiveness and efficiency problems of real world problems

New Frontiers in Information and Software as Services Divyakant Agrawal, K. Selçuk Candan, Wen-Syan Li, 2011-02-10 The increasing costs of creating and maintaining infrastructures for delivering

services to consumers have led to the emergence of cloud based third party service providers renting networks computation power storage and even entire software application suites On the other hand service customers demand competitive pricing service level agreements and increased flexibility and scalability Service consumers also expect process and data security 24 7 service availability and compliance with privacy regulations This book focuses on such challenges associated with the design implementation deployment and management of data and software as a service The 12 papers presented in this volume were contributed by leaders in academia and industry and were reviewed and supervised by an expert editorial board They describe cutting edge approaches in areas like service design service security service optimization and service migration

Issues & Trends of Information Technology Management in Contemporary Organizations Information Resources Management Association. International Conference, 2002-01-01 As the field of information technology continues to grow and expand it impacts more and more organizations worldwide The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed This valuable book is a compilation of the latest research in the area of IT utilization and management

Advances in Petri Net Tauseef Aized, 2010-09-27 The world is full of events which cause end or affect other events The study of these events from a system point of view is very important Such systems are called discrete event dynamic systems and are of a subject of immense interest in a variety of disciplines which range from telecommunication systems and transport systems to manufacturing systems and beyond There has always been an intense need to formulate methods for modelling and analysis of discrete event dynamic systems Petri net is a method which is based on a well founded mathematical theory and has a wide application This book is a collection of recent advances in theoretical and practical applications of the Petri net method and can be useful for both academia and industry related practitioners
