Working With The Grain Integrating Governance And Growth In Development Strategies:

Working with the Grain Brian Levy, 2014-08-28 The development discourse has long been dominated by best practices prescriptions for reform but these are not a useful way of responding to the governance ambiguities of the early 21st century. Working with the Grain draws on both innovative scholarship and Brian Levy's quarter century of experience at the World Bank to lay out an alternative a practical analytically grounded with the grain approach to reducing poverty and addressing weaknesses in governance. Best practice prescriptions confuse the goals of development with the journey of getting from here to there. A strong rule of law capable and accountable governments and a flexible level playing field business environment are indeed desirable end points. But the ability to describe well governed states does not conjure them into existence. If the only available actions are all or nothing then efforts at change will almost certainly fall short leading to disillusion and despair. By contrast this book takes as its point of departure the realities of a country's economy polity and society and directs attention towards the challenges of initiating and sustaining forward development momentum. The book distinguishes among four broad groups of countries according to whether polities are dominant or competitive and whether institutions are personalized or impersonal. It identifies alternative options for governance and policy reform: top down options which endeavor to strengthen formal institutions and options supporting the emergence of islands of effectiveness. It explores how to identify entry points for change where there is a good fit between divergent country contexts and alternative options for reform. Sometimes the binding constraint to forward movement can be institutional making governance reform the priority; at other times the priority can better be on inclusive growth. Taking the decade or so time horizon of practitioners the aim is to nudge things along seeking gains that initially may seem quite modest but sometimes can give rise to a cascading sequence of change for the better.

Working with the Grain Brian Levy, 2014 This text directs attention away from unattainable good governance and towards with the grain institutional reforms that can initiate and sustain development momentum. It shows how to find a good fit between country context and governance reform with virtuous circles of change sometimes transforming seemingly modest reforms into a cascading sequence of gains.

Ferguson,Matthias vom Hau,Sam Hickey,Brian Levy,2022-05-05 Few concepts have captured the imagination of the conflict and development community in recent years as powerfully as the idea of a political settlement At its most ambitious political settlements analysis PSA promises to explain why conflicts occur and states collapse the conditions for their successful rehabilitation different developmental pathways from peace and how to better fit development policy to country context Yet not all is well in the world of PSA Rival definitions of the term abound there are disagreements about its scope and the way it should be used a growing schism between conflict specialists and economists basic concepts are ambiguous and little progress has been made on measurement Political Settlements and Development consequently has three main aims to argue for a revised definition of a political settlement capable of unifying its diverse strands and opening new opportunities for the analysis of conflict and development to put the concept on a more solid theoretical and scientific footing providing a method for measuring and categorising political settlements while using new data to analyse the relationship between political

settlements and development and finally to examine the implications for policymakers This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Pockets of Effectiveness and the Politics of State-Building and Development in Africa Sam Hickey,2023 This book shows that politics is the driving factor that shapes how well state agencies perform their roles It deploys a new conceptual framework the power domains approach to explore the shifting fortunes of key state agencies in five countries Ghana Kenya Rwanda Uganda and Zambia over the past three decades Smugglers and States Max Gallien,2024-02-27 Winner 2025 Theodore J Lowi First Book Award

International Political Science Association American Political Science Association Smuggling is typically thought of as furtive and hidden taking place under the radar and beyond the reach of the state But in many cases governments tacitly permit illicit cross border commerce or even devise informal arrangements to regulate it Drawing on extensive fieldwork in the borderlands of Tunisia and Morocco Max Gallien explains why states have long tolerated illegal trade across their borders and develops new ways to understand the political economy of smuggling This book examines the rules and agreements that govern smuggling in North Africa tracing the involvement of states in these practices and their consequences for borderland communities Gallien demonstrates that contrary to common assumptions about the effects of informal economies smuggling can promote both state and social stability States not only turn a blind eye to smuggling they rely on it to secure political acquiescence and maintain order because it provides income for otherwise neglected border communities More recently however the securitization of borders wars political change and the pandemic have put these arrangements under pressure Gallien explores the renegotiation of the role of smuggling showing how stability turns into vulnerability and why some groups have been able to thrive while others have been pushed further to the margins With both rich empirical detail and novel theoretical contributions Smugglers and States offers important insights into security and stability in North Africa and the prospects for economic inclusion in a context where many livelihoods exist outside of the law

Development Strategies Brian Levy, 2017 A frontier challenge for development strategy is to move beyond prescribing optimal economic policies and instead taking a broad view of the interactions between economic political and social constraints and dynamics to identify entry points capable of breaking a low growth logjam and initiating a virtuous spiral of cumulative change The paper lays out four distinctive sequences via which the different dimensions might interact and evolve over time and provides country specific illustrations of each Each sequence is defined by the principal focus of its initial step 1 State capacity building provides a platform for accelerated growth via improved public sector performance and enhanced credibility for investors strengthened political institutions and civil society come onto the agenda only over the longer term 2 Transformational governance has as its entry point the reshaping of a country s political institutions Accelerated growth could follow insofar as institutional changes enhance accountability and reduce the potential for arbitrary discretionary action and thereby shift expectations in a positive direction 3 For just enough governance the initial focus is on growth itself with the aim of addressing specific capacity and institutional constraints as and when they become binding not seeking to anticipate and address in advance all possible institutional constraints 4 Bottom up development engages civil society as an entry point for seeking stronger state capacity lower corruption better public services improvements in political institutions more broadly and a subsequent unlocking of constraints on growth The sequences should not be viewed as a technocratic toolkit from which a putative reformer is free to choose Recognizing that choice is constrained by history the paper concludes by suggesting an approach for exploring what might the scope for identifying practical ways forward in specific country settings

governance reform It lays out two especially prevalent trajectories that differ starkly from one another in how they prioritize and sequence economic growth state building and the development of civil society and political institutions The first trajectory focuses initially on investments in state capacity The second initially prioritizes smaller more catalytic entry points and addresses specific capacity and institutional constraints as and when they become binding Over the longer term both trajectories endogenously generate incentives to strengthen institutions that underpin economic competition and political accountability But over the short to medium term the strengths of one trajectory are mirrored as the weakness of the other For many low income countries the combination of rapid growth plus a seeming excess of either order or chaos may thus be in the medium term nature of things rather than an aberration that requires fixing
