Ball Maria Tamboukou,2022-06-29 This edited volume

explores how Stephen Ball's work has shaped the field of the sociology of education worldwide. Written by internationally based researchers who are Ball's former PhD students, it draws on different strands of his work to show what it means to think, write and do research inspired by Ball's theory, methodology and epistemology. The contributions revolve around a wide range of themes including the ethics of doing educational research, disability studies, the bio-politics of the child's soul, lived experiences of marginalisation in education, educating migrant and refugee women in the borderlands and post-Brexit reflections on the Bologna process. Chapters draw on different lines of thought from the corpus of a significant and influential figure in the sociology of education to present, explicate and discuss a wide range of research projects, themes, theoretical directions as well as methodological approaches in the field of the sociology of education today. More than celebrating Ball's scholarship, this volume shows new and innovative directions in the sociology of education. It will be highly relevant reading for researchers, scholars and students in the sociology of education, educational policy and politics and educational theory.
