Education? Philip W. Jackson, 2011-11-07 One day in 1938 John Dewey addressed a room of professional educators and urged them to take up the task of finding out just what education is Reading this lecture in the late 1940s Philip W Jackson took Dewey s charge to heart and spent the next sixty years contemplating his words The stimulating result of a lifetime of thinking about educating *What Is Education* is a profound philosophical exploration of how we transmit knowledge in human society and how we think about accomplishing that vital task Most contemporary approaches to education follow a strictly empirical track aiming to discover pragmatic solutions for teachers and school administrators Jackson argues that we need to learn not just how to improve on current practices but also how to think about what education means in short we need to answer Dewey by constantly rethinking education from the ground up Guiding us through the many facets of Dewey s comments Jackson also calls on Hegel Kant and Paul Tillich to shed light on how a society does can and should transmit truth and knowledge to successive generations Teasing out the implications in these thinkers works ultimately leads Jackson to the conclusion that education is at root a moral enterprise At a time when schools increasingly serve as a battleground for ideological contests *What Is Education* is a stirring call to refocus our minds on what is for Jackson the fundamental goal of

education making students as well as teachers and therefore everyone better people

Thought and Action Brian A. Williams, 1998

Canadian Philosophical Reviews, 1996

The Evolution of John Dewey's Conception of Philosophy and His Notion of Truth Melvin Tuggle, 1997 The main thesis of this book is that John Dewey's conception of philosophy began and culminated with his concern about the problem of truth Moreover it is asserted that Dewey's mature conception of philosophy and his notion

of truth may be quite profitable for resolving some of our more recent contemporary philosophical problems To clarify his mature thoughts about philosophy and truth this study surveys the stages of Dewey s development during his long lifetime of ninety three years Publications of the State of Illinois 1994 , **Philosophy of Education** Philosophy of Education Society (U.S.),2001 **The Best Books for Academic Libraries: General works, military & naval, library science** ,2002 Adult Education at the Crossroads Matthias Finger,José Manuel Asún,2001 This is a pithy assessment of where adult education now stands the traditions out of which it came its current problems and possible futures The authors are particularly concerned with how its longstanding commitment to deliver social change ran into difficulties in the less favourable circumstances of the 1980s and 1990s They argue that its purposes now need to be reconceptualized in order for it to become once again a relevant and effective agent of change The authors remind adult educationists of their traditional commitment to social action by surveying the ideas of seminal adult education thinkers as they developed historically in Europe North America and later the Third World They show how today s very different context has eroded that original vision and purpose The book concludes by identifying four possible future scenarios the challenges confronting an adult education still committed to social change and the key features which they believe can contribute to learning our way out of the current impasse **American Book Publishing Record** ,2005
