Exploring the Domain of Accident Law Don DeWees, David Duff, Michael Trebilcock, 1996-01-04 In the mid 1980s there was a crisis in the availability affordability and adequacy of liability insurance in the United States and Canada Mass tort claims such as the asbestos DES and Agent Orange litigation generated widespread public attention and the tort system came to assume a heightened prominence in American life While some scholars debate whether or not any such crisis still exists there has been an increasing political judicial and academic questioning of the goals and future of the tort system Exploring the Domain of Tort Law reviews the evidence on the efficacy of the tort system and its alternatives By looking at empirical evidence in five major categories of accidents automobile medical malpractice product related accidents environmental injuries and workplace injuries the authors evaluate the degree to which the tort system conforms to three normative goals deterrence corrective justice and distributive justice In each case the authors review the deterrence and compensatory properties of the tort system and then review parallel bodies of evidence on regulatory penal and compensatory alternatives Most of the academic literature on the tort system has traditionally been doctrinal or in recent years highly theoretical Very little of this literature provides an in depth

consideration of how the system works and whether or not there are any feasible alternatives Exploring the Domain of Tort Law contributes valuable new evidence to the tort law reform debate It will be of interest to academic lawyers and economists policy analysts policy professionals in government and research organizations and all those affected by tort law reform

The Law of Open Societies Jürgen Basedow, 2015-06-02 This book endeavours to interpret the development of private international law in light of social change Since the end of World War II the socio economic reality of international relations has been characterised by a progressive move from closed to open societies The dominant feature of our time is the opening of borders for individuals goods services capital and data It is reflected in the growing importance of ex ante planning as compared with ex post adjudication of cross border relations between individuals and companies What has ensued is a shift in the forces that shape international relations from states to private actors The book focuses on various forms of private ordering for economic and societal relations and its increasing significance while also analysing the role of the remaining regulatory powers of the states involved These changes stand out more distinctly by virtue of the comparative treatment of the law and the long term perspective employed by the author The text is a revised and updated version of the lectures given by the author during the 2012 summer courses of the Hague Academy of International Law
