Qualità dei sistemi e del software Martin Wieczorek,Diederik Vos,Heinz Bons,2015-11-27 La domanda qual il contributo

che la qualità del software e dei sistemi possono apportare al successo del business di un'azienda e come possiamo garantire la giusta qualità dei sistemi e dei prodotti basati sul software una domanda retorica. Come in molti altri settori anche l'industria del software è in continua trasformazione. Le innovazioni e le nuove soluzioni scaturiscono da nuove esigenze provenienti dai mercati e dalla disponibilità di nuove tecnologie. Già da molti anni l'industria del software è influenzata da un proprio alto tasso di innovazione che ha avuto un impatto su tutte le fasi del ciclo di vita di un software e di un sistema. I cambiamenti che vediamo nel software includono anche la gestione e la garanzia della qualità nel suo insieme. Sebbene alcune best practice siano già ora messe in pratica c'è molto spazio per migliorare. A nostro avviso non ancora presente nel settore IT un approccio olistico alla qualità dei prodotti e dei sistemi software. Deve essere definita in maniera chiara la giusta qualità dei sistemi e dei prodotti basati sul software. Per questo motivo diamo uno sguardo ai sistemi integrati e ai sistemi IT impariamo qualcosa da entrambi e discutiamo il nostro approccio per la giusta qualità del software e dei sistemi.
