Wild Profusion Biodiversity Conservation In An Indonesian Archipelago In Formation:

Wild Profusion Celia Lowe, 2006-10-03 *Wild Profusion* tracks the convergence of Indonesian biologists Sama people and flora and fauna in the Togean Islands of Sulawesi to tell the story of biodiversity conservation in 1990s Indonesia

Wild Profusion Celia Lowe, 2013-10-31 *Wild Profusion* tells the fascinating story of biodiversity conservation in Indonesia in the decade culminating in the great fires of 1997-98 a time when the country's environment became a point of concern for social and environmental activists scientists and the many fishermen and farmers nationwide who suffered from degraded environments and faced accusations that they were destroying nature Celia Lowe argues that biodiversity in 1990s Indonesia implied a particular convergence of nature nation science and identity that made Indonesians mapping of the concept distinct within transnational practices of nature conservation at the time Lowe recounts the efforts of Indonesian biologists to document the species of the Togean Islands to develop Togeans and to turn this archipelago off the coast of Sulawesi into a national park Indonesian scientists aspired to a conservation biology that was both internationally recognizable and politically effective in the Indonesian context Simultaneously Lowe describes the experiences of Togeans Sama people who had their own understandings of nature and nation To place Sama and scientist into the same conceptual frame Lowe studies Sama ideas in the context of transnational thought rather than local knowledge In tracking the practice of conservation biology in a postcolonial setting *Wild Profusion* explores what in nature can count as important and for whom

Insurgent Citizenship James Holston, 2021-06-08 *Insurgent citizenships* have arisen in cities around the world This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo Brazil its entanglement with entrenched systems of inequality and its contradiction in violence James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation states one that is universally inclusive in national membership and massively inequalitarian in distributing rights and in its legalization of social differences But since the 1970s he shows residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old Their mobilizations have developed not primarily through struggles of labor but through those of the city particularly illegal residence house building and land conflict Yet precisely as Brazilians democratized urban space and achieved political democracy violence injustice and impunity increased dramatically Based on comparative ethnographic and historical research *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it Rather than view this paradox as evidence of democratic failure and urban chaos *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies emerging and established Focusing on processes of city and citizen making now prevalent globally it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories

Anthropology and Egalitarianism Eric Gable, 2010-12-03 *Anthropology and Egalitarianism* is an artful and accessible

introduction to key themes in cultural anthropology Writing in a deeply personal style and using material from his fieldwork in three dramatically different locales Indonesia West Africa and Monticello the historic home of Thomas Jefferson Eric Gable shows why the ethnographic encounter is the core of the discipline s method and the basis of its unique contribution to understanding the human condition Gable weaves together vignettes from the field and discussion of major works as he explores the development of the idea of culture through the experience of cultural contrast anthropology s fraught relationship to racism and colonialism and other enduring themes **The British National Bibliography** Arthur James Wells,2006 **American Book Publishing Record** ,2006 *Investing in Biodiversity* Michael Wells,1999-01-01 Indonesia

is one of the two most biologically diverse nations on earth The country s thousands of islands include 10 percent of the world s known plant species 12 percent of its mammals 16 percent of reptiles and amphibians 17 percent of birds and 25 percent of fish In a country where conservation awareness or support for nature conservation and Protected Areas PAs is lacking throughout the society efforts to promote ICDPs Integrated Conservation and Development Projects will work only if the Government of Indonesia and provincial governments first demonstrate a strong commitment to protecting conservation areas and their surroundings Current ICDP components based on simplistic ideas of making limited short term investments in local development and hoping this will somehow translate into sustainable resource use and less pressure on PAs need to be abandoned The objectives of this study are 1 to consider the ICDPs overall contribution to conserving Indonesia s biodiversity 2 to assess their cost effectiveness sustainability and replicability and 3 to identify lessons for future conservation efforts This study emphasized the use of qualitative information supplemented by limited quantitative analysis from case studies interviews and an extensive review of project documentation mainly plans progress reports and evaluations

Ecology of the Indonesian Seas Part 2 Tomas Tomascik,Anmarie J. Mah,2013-02-05 The Ecology of the Indonesian Seas distills for the first time the information found in thousands of scholarly works relevant to an understanding of the sustainable use of marine and coastal resources in these islandsmany of them available up to now only in Dutch German or Indonesian It is an invaluable tool for government planners resource managers ecologists university students scuba divers and all those with an interest in the sea The second volume discusses the origins formation and distribution of various reef types in the Indonesian Archipelago and provides new estimates on their extent The second volume also provides a review of the ecology of Indonesian seagrass mangrove and open ocean ecosystems The chapter on marine biodiversity focuses on a number of marine and coastal habitats and threatened marine organisms The final two chapters discuss what recent effects the human race has had on marine resources and what we can do to protect and preserve our marine and coastal zones for generations to come **Life After Logging** E. Meijaard,Douglas Sheil,Robert Nasi,David Augeri,Barry Rosenbaum,Djoko Iskandar,Titiek Setyawati,Martjan Lammertink,Ike Rachmatika,Anna Wong,Tonny Soehartono,Scott Stanley,Timothy O'Brien,2005-01-01 This book presents a technical review of ecological and life history information on a range of Bornean

wildlife species aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1 those involved in assessing and regulating timber harvesting activities in Southeast Asia; 2 those involved in trying to achieve conservation goals in the region; and 3 those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non governmental organisations promoting sustainable forest management and eco labelling. Finally it identifies a number of shortcomings and gaps in knowledge which the hope can interest the scientific community and promote further research. This review is an important scientific step toward understanding and improving sustainable forestry practices for long term biodiversity conservation. Even in the short term however significant improvements can be made to improve both conservation and the efficiency of forest management and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

Ecology of Insular Southeast Asia Friedhelm Goltenboth, Kris H. Timotius, Paciencia P. Milan, Josef Margraf, 2006-12-07

The textbook entitled *Tropical Ecology of Southeast Asia: The Indonesian Archipelago* unfolds in its 5 major chapters with 20 subchapters on more than 500 pages with more than 300 figures. The basic principles of ecology with examples mainly coming from the Indonesian Archipelago. After an introduction describing the geography, geology and climate of the region, the second chapter is dedicated to marine and freshwater ecosystems. Chapters on the functional ecology of seagrass beds, coral reefs, open ocean and deep sea are followed by information on lotic and lentic freshwater ecosystems. In chapter III, ecotones and special ecosystems of the archipelago are in focus. The ecology and ecosystems of shore and tidal flats, mangroves, estuaries and soft bottom shores, caves, small islands, grasslands and savannas are described. The forest ecosystems with beach forest, tropical lowland evergreen rainforest, some special forest systems and mountain forests form the contents of chapter IV. The final chapter V is dealing with agroecosystems and human ecology. The main focus in this chapter is ricefield ecology, land use systems and social ecology including the advent of man and the development and expansion of man influencing this archipelago. An extended glossary and bibliography is added as well as tables of abbreviations, conversion factors, international system of units and measurements or SI and a geological time table and systematics. The index gives access to important keywords and relevant information spread throughout the contents of the book. The textbook will certainly be useful to teachers, lecturers and their students at university and college level.
