confines and in particular steers away from the dilemmas of paradise or paradox in order to advance an intellectual and policy agenda of plurality and diversity rather than of prescription and definition Drawing on case studies from Australia Aotearoa New Zealand the United States and Iceland and explorations of embodied experience creative practice philosophy and First Nations land management approaches the assembled chapters examine wilderness ideals conflicts and human nature dualities afresh and examine co existence and conservation in the Anthropocene in diverse ontological and multidisciplinary ways By demonstrating a strong commitment to respecting the knowledge and perspectives of Indigenous peoples this work delivers a more nuanced ethical and decolonising approach to issues arising from relationships with wilderness Such a collection is immediately appropriate given the political challenges and social complexities of our time and the mounting threats to life across the globe The abiding and uniting logic of the book is to offer a unique and innovative contribution to engender transformations of wilderness scholarship activism and conservation policy This text refutes the inherent privileging and exclusionary tactics of dominant modes of enquiry that too often serve to silence non human and contrary positions It reveals a multi faceted and contingent wilderness alive with agency diversity and possibility This book will be of great interest to students and scholars of conservation environmental and natural resource management Indigenous studies and environmental policy and planning It will also be of interest to practitioners policymakers and NGOs involved in conservation protected environments and environmental governance **Purpose Beyond 2012** Wj

history of remaking nature When the 2020 Nobel Prize was awarded to the inventors of CRISPR the revolutionary gene editing tool it underlined our amazing and apparently novel powers to alter nature But as biologist Beth Shapiro argues in *Life as We Made It* this phenomenon isn't new Humans have been reshaping the world around us for ages from early dogs to modern bacteria modified to pump out insulin Indeed she claims reshaping nature resetting the course of evolution ours and others is the essence of what our species does In exploring our evolutionary and cultural history Shapiro finds a course for the future If we have always been changing nature to help us survive and thrive then we need to avoid naive arguments about how we might destroy it with our meddling and instead ask how we can meddle better Brilliant and insightful *Life as We Made It* is an essential book for the decades to come
