z/OS Traditional Application Maintenance and Support Jonathan Sayles,Chris Rayns,Vijay Sankar,John Milne,Deena Stein,Debasish Dash,Ofer Pharhi,IBM Redbooks,2011-06-23 In this IBM Redbooks publication we attempt to provide fresh insight into a problem domain that in the authors opinions has been pushed to the back burner of technology writing for far too long the domain of z OS traditional mainframe maintenance and production support Since the mid 1980 s outside of a few websites

and publications this still critical area of software has barely even received lip service by the world of mainstream technology media In a small way we are attempting address this situation In this book we provide information in what and how to sections on the value of z OS maintenance and support not the value of the software which is hardly in question but the value of the software developers and how they collaborate analyze code and test the applications fixes and enhancements under their responsibility We present new 21st Century tools to help them achieve their goals more easily and effectively These tools integrate and provide a 1 1 1 5 value proposition for companies that are still doing work the way they did when in the mid 1970 s when Gerald Ford was president of the United States We are also describing to a lesser extent how you can effectively integrate the new tools with your existing development software stack in order to find points of complimentary functionality And we describe the new agile development and maintenance methodologies and best practices for tools use and adoption We hope that you find this work useful and perhaps that it can fuel more discussion future Redbooks publications and other publications by IBM or any vendor or group interested in this critical and vastly under acknowledged technology domain
