Climate Change, Capitalism, and Corporations Christopher Wright, Daniel Nyberg, 2015-09-23 Climate change is one of the greatest threats facing humanity a definitive manifestation of the well worn links between progress and devastation This book explores the complex relationship that the corporate world has with climate change and examines the central role of corporations in shaping political and social responses to the climate crisis The principal message of the book is that despite the need for dramatic economic and political change corporate capitalism continues to rely on the maintenance of business as usual The authors explore the different processes through which corporations engage with climate change Key discussion points include climate change as business risk corporate climate politics the role of justification and compromise and managerial identity and emotional reactions to climate change Written for researchers and graduate students this book moves beyond descriptive and normative approaches to provide a sociologically and critically informed theory of corporate responses to climate change

Guion, 2010-06-21 This book the first in the American Wind Band series is a comprehensive account of the development of the trombone from its initial form as a 14th century Medieval trumpet to its alterations in the 15th century from its marginalized use in a particular Renaissance ensemble

The End of the Concessionary Regime Brandon Wolfe-Hunnicut, 2011 This dissertation analyzes the historical process that culminated in the 1972 nationalization of the Iraq Petroleum Company IPC a consortium that included four of the world's largest and most powerful corporations I draw on IPC archives recently declassified U S Government documents and the Arab press to trace the impact of Iraq's 1958 Free Officers Revolution on IPC interests in Iraq I show that the Revolution set in motion a process of institutional development that resulted in the complete nationalization of the Iraqi oil industry at a relatively early date and I emphasize the agency of a particular group of Western trained Iraqi technical experts in producing this outcome Moreover I examine U S and IPC efforts to counter Iraq's radical movements and offer an original interpretation of the relationship between the American government and the international oil industry I show that the Iraqi challenge to the IPC undermined the stability of an implicit corporatist bargain between the U S State Department and the major American oil companies and that the breakdown of this relationship was part of a larger crisis of American hegemony in the early 1970s In so doing I reveal powerful underlying factors that continue to drive the historical encounter between the U S and the Middle East

Webb, Christopher R. Fee, 2024 Contextualizes and analyzes the key energy transitions in U S history and the central importance of energy production and consumption on the American environment and in American culture and politics *The New International Encyclopaedia* , 1905
