Primary School Geography (1994) Bill Marsden, Jo Hughes, 2019-07-24 Published in 1994 this book is the result of the collaborative work undertaken at the Liverpool based Geography INSET Primary Project GIPP over three years. It presents a series of chapters for primary teachers seeking to implement the Statutory Orders for Geography in the National Curriculum. Steering a middle course between the sophistications of a theoretical methodological text and the over simplifications of a tips for teachers approach, the authors highlight the positive opportunities offered by the National Curriculum. At the same time they are critical of many aspects of the Statutory Orders without losing sight of their objective to help teachers to improve the quality of primary geography teaching. The book is especially useful for INSET work for teachers who have already grappled with National Curriculum Geography and who will be adjusting to the post Dearing rearrangements. The Multi-age Learning Community in Action Barbara Cozza, 2017-09-18 As schools struggle to teach all students the multi age teaching and learning framework has emerged as one of today's most effective ways to structure schools. Multi age Learning Community (MAC) Program is a professional development program in action. It presents a framework that can transform schools from a graded system to a multi age learning environment. This multi age school targets students' individual and personal needs and allows students to excel and succeed. The school reform climate today focuses on schools of choice and building effective school environments. This multi age program creates a unique school niche that is marketable to families. Parents have the option of sending their children to schools that concentrate on achievement that best meets the needs of the learner without disrupting the mandates of the curricula. This book is intended to assist educators at all levels of all school organizations as well as give policymakers, educators, and parents the information on an effective school program. This book gives information on how to transform schools into multi age classrooms. This book is divided into four parts that explain both the theory and the practice of effective strategies for the multi age school program: Organizational Practice, Building Culture, Learning Processes, and Assessment and Systemic Improvement. There are specific basic principles and practices that are integrated into a quality and effective framework discussed in the chapters of this book. Each chapter begins with a vignette based on my experiences in multiage schools and concludes with an educator's reflection to recap the concepts in the chapter. Each chapter also integrates snapshots that are short real to life passages that bring to life concepts discussed in the chapter. Although this book discusses multi age schools, these ideas may be applied to all school environments. To accommodate all school programs, at the end of each chapter a section titled Application for All Schools is a framework that discusses just how to apply chapter concepts in any school or classroom program. It is recommended that the reader review the book one time in sequence and then reread each chapter as needed to give meaning to the reader's purpose. The Inclusive World of Today's Classrooms Barbara Cozza, 2022-11-28 As school systems struggle to meet the needs of all learners, this learning framework is the most

effective way to structure schools The book is intended to assist educators at all levels of school organizations and give policymakers and parents information on an effective way to encourage learners to achieve on high levels The audience should read this book to gain ideas on how to improve school programs when accommodating the diversity of students found in classrooms This book integrates concepts focused on inclusivity social reform and second language learning strategies Technology and a multi age learning community framework are elements that transform a traditional school program into a powerful learning community for accommodating all learners to achieve on high levels
