Yearning For Normal Learning Acceptance:

Yearning for Normal Susan Ellison Busch, 2013-08-13 This award winning book tells a mother's story of raising her son Michael who was born missing a submicroscopic piece of chromosome 22. That tiny missing fragment of DNA affected every aspect of his life physically, mentally, and spiritually. Michael's mother describes her adventures and misadventures with the medical system, educational system, and legal system during his growing up years. While Michael and his mother were both yearning for normal through their struggles, they were also learning acceptance of life as it is with all its glory and imperfections. This heartbreaking journey takes readers through hospitals, backyards, schoolrooms, psychiatric wards, courtrooms, a burn unit, and the corridors of Susan's heart. This story is not just for parents of children with special needs but for their friends, neighbors, doctors, nurses, teachers, speech therapists, social workers, police officers, paramedics, firefighters, ministers, and whoever else likes a good story. This story is also for those who have watched someone they love suffer and felt hopeless and powerless, wondering where God was in the midst of the pain. **Yearning for Normal** Susan E

Busch, 2015-02-05 This award winning book tells a mother's story of raising her son Michael who was born missing a submicroscopic piece of chromosome 22. That tiny missing fragment of DNA affected every aspect of his life physically, mentally, and spiritually. Michael's mother describes her adventures and misadventures with the medical system, educational system, and legal system during his growing up years. Manifold desires, personal, political, cultural, produce and animate STEM education. Queer theories instigate and explore possibilities for knowing and being through desires, normal, and strange. The provocative original manuscripts in this collection draw on queer theories and allied perspectives to trace entanglements of STEM education, sex, sexuality, gender, and desire, and to advance constructive critique, creative world making, and compassionate advocacy. Not just another call for inclusion, this volume turns to what and how STEM education and diverse desiring subjects might be in relation to each other and the world. *STEM of Desire* is the first book-length project on queering STEM education. Eighteen chapters and two poems by 27 contributors consider STEM education in schools and universities, museums, and other informal learning environments, and everyday life. Subject areas include physical and life sciences, engineering, mathematics, nursing, and medicine, environmental education, early childhood education, teacher education, and education standards. These queering orientations to theory, research, and practice will interest STEM teacher educators, teachers, and professors, undergraduate and graduate students, scholars, policy makers, and academic libraries. Contributors are Jesse Bazzul, Charlotte Boulay, Francis S. Broadway, Erin A. Cech, Steve Fifield, Blake M. R. Flessas, Andrew Gilbert, Helene G. Tschel, Emily M. Gray, Kristin L. Gunckel, Joe E.
