Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language technology interface has propelled dramatic changes in and increased opportunities for second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook, consisting of four parts: language teaching and learning through technology; the technology pedagogy interface; technology for L2 assessment and research; and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language, including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials developers, and researchers.

Joyce in the Belly of the Big Truck; Workbook Joyce A. Cascio, 2005-05

Online Communication in a Second Language Sarah E. Pasfield-Neofitou, 2012-10-01

Online Communication in a Second Language examines the use of social computer-mediated communication with speakers of Japanese via longitudinal case studies of up to four years. Through the analysis of over 2,000 instances of online communication, in addition to extensive interviews, the book explores opportunities for language acquisition and use in authentic online interaction.

The Japanese Sentence-final Particles in Talk-in-interaction Hideki Saigo, 2011

The Japanese sentence-final particles *ne*, *yo*, and *yone* have proved notoriously difficult to explain and are especially challenging for second language users. This book investigates the role of the particles in talk-in-interaction with the aim of providing a comprehensive understanding that accounts for their pragmatic properties and sequential functions and that provides a sound basis for second language pedagogy. This study starts by setting up an original particle function hypothesis based on the figure-ground gestalt and then tests its validity empirically with unmarked, marked, and native/non-native talk-in-interaction data. The analysis illustrates not only expectable but also unexpected or strategic use of particles, as well as the problems posed for native speakers by non-native speakers whose use of particles is idiosyncratic. The study demonstrates that the proposed hypothesis is capable of accounting for all the uses of particles in the extensive and varied data set examined. This book will be of interest to students and scholars in pragmatics and CA and to teachers of Japanese as a foreign language.
