Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

A Companion to Boniface Michel Aaij,Shannon Godlove,2020-06-15 The eighth century English missionary and church reformer Boniface was a highly influential figure in early medieval Europe His career in what is now Germany France and the Netherlands is attested in an exceptional number of textual sources a correspondence of 150 letters Latin poetry church council records and other documents Numerous saints lives and modern devotional materials further reveal how he was and is remembered by the religious communities that claim him as a foundational figure This volume comprises the latest scholarship on Boniface and his fellow missionaries examining the written materials associated with Boniface his impacts on the regions of Europe where he worked Hessia Thuringia Bavaria Frisia and Francia and the development of his cult in the Middle Ages and today Contributors Michel Aaij John Henry Clay Michael Glatthaar Shannon Godlove Leanne Good Petra Kehl Felice Lifshitz Rob Meens Michael Edward Moore Marco Mostert James Palmer Janneke Raaijmakers Rudolf Schieffer Emily Thornbury Siegfried Weichlein and Barbara Yorke **Handbook of Dutch Church History** Herman J.

Selderhuis,2014-12-10 Herman Selderhuis as editor of this volume has brought together a team of experts resulting in a unique approach since each chapter is co written by a catholic and a protestant author who have all integrated the latest research results Each section begins with a brief historiographical overview The same time ecclesiastical events are always set within a greater framework of political social and cultural developments for which reason each author has taken the liberty to describe its own method The user will find in this book tables diagrams and illustrations Also many source texts are integrated in the narration Theses texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words The name of the book as Handbook of the church history of the Netherlands immediately brings to mind three problematic complexes which are relevant to its user First there is the nature of a handbook that is

intended to be a good tool but also has its limitations it stimulates and necessitates the use of further books Second the area The Netherlands is a plurality and that is also noticeable in its church history for each region town and village has its own church history Third the history of the church for sure is the most important aspect but this history can only be understood if it is described in the context of political and social developments The Making of the Monastic Community of Fulda, c.744-c.900 Janneke Raaijmakers,2012-03-01 The monastic community of Fulda was one of the most powerful institutions in early medieval Europe This book traces the development of the community from its foundation in the 740s over one and a half centuries a period richly documented by a variety of texts and archaeological remains These sources reveal how Fulda's success forced the monks to rethink their goals and the ways in which they sought to achieve them Its close connection to the Carolingian royal court also makes Fulda a fascinating case study of how local events influenced life in the palace and vice versa The importance of Fulda and the rich array of sources associated with it have long been recognised but this is the first full study bringing together theology architectural history and archaeology The result is a vivid picture of life in this monastery and also in early medieval religious communities in general The National Union Catalog, Pre-1956 Imprints,1974 *Anglo-Saxons in a Frankish World, 690-900* James T. Palmer,2009 This series focuses on Western Europe in the Early Middle Ages and covers work in the areas of history language literature archaeology art history and religious studies It brings together current scholarship on early medieval Britain with scholarship on western continental Europe and Viking Scandinavia these areas have more traditionally been studied separately or in terms of the interaction of discrete cultures and regions As well as advocating new approaches across geographical and political divisions this series spans the conventional distinctions between Late Antiquity and the Early Middle Ages on the one hand and the Early Middle Ages and the twelfth century on the other **Studien und Mitteilungen zur Geschichte des Benediktiner-Ordens und seiner Zweige**,1909 *The New Cambridge Medieval History* Rosamond McKitterick,1995 Sample Text In Samuel's Image Mayke De Jong,1996 This study is about the multitude of early medieval children donated to God in the monastery It puts child oblation in the context of contemporary gift giving practices providing in depth treatment of the oblation ritual and its social setting **Spiritual Kinship as Social Practice** Bernhard Jussen,2000 This book deals with kinship in the early Middle Ages Most scholars agree in theory that kinship is not a biological fact but a universally deployable system for structuring social relations In empirical practice however research on kinship has focused almost exclusively on descent and alliance This book addresses kinship beyond these concepts It is a study of godparenthood and adoption in Frankish society at the time when Roman adoption was disappearing and godparenthood was being invented as a social tool BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Conquest and Christianization** Ingrid Rembold,2018 Re evaluates the political integration and Christianization of Saxony following its violent conquest 772 804 by Charlemagne **Die Baugeschichte der Kirche des heiligen Victor zu Xanten** Stephan Beissel,1883
