Wild Indonesia The Wildlife And Scenery Of The Indonesian Archipelago:

Wild Indonesia Gerald S. Cubitt, Tony Whitten, Jane Whitten, 1992 Depicts the plants and animals native to the national parks of each region in Indonesia **The Indonesian Environmental Almanac** Indonesia. Kantor Menteri Negara Lingkungan Hidup, Indonesia. Badan Pengendalian Dampak Lingkungan, Yayasan Kalpa Wilis, 1997 *Indonesia* Tristan Burton, 2006 One of a series of titles that takes an in depth look at various countries around the world examining their environment politics and other features **Archipelago** Gavan Daws, Marty Fujita, 1999 From the 19th century discoveries of Alfred Russell Wallace to the fate of forests and reefs in the 21st century examine the beauty and grace of Indonesian Islands 211 color illustrations Maps photos line drawings The Song of the Dodo David Quammen, 2011-03-15 Compulsively readable a masterpiece maybe the masterpiece of science journalism Bill McKibben Audubon A brilliant stirring work breathtaking in its scope and far reaching in its message The Song of the Dodo is a crucial book in precarious times Through personal observation scientific theory and history David Quammen examines the mysteries of evolution and extinction and radically alters our understanding of the natural world and our place within it In this landmark of science writing we learn how the isolation of islands makes them natural laboratories of evolutionary extravagance as seen in the dragons of Komodo the elephant birds of Madagascar the giant tortoises of the Galapagos But the dark message of island studies is that isolated ecosystems whether natural or human made are also hotbeds of extinction And as the world s landscapes from Tasmania to the Amazon to Yellowstone are carved into pieces by human activity the implications of this knowledge are more urgent than ever An unforgettable scientific adventure a fascinating account of an eight year journey of discovery and a wake up call for our time David Quammen s The Song of the Dodo is an exquisitely written book that takes the reader on a globe circling tour of wild places and extraordinary ideas **Indonesia** Florence Lamoureux, 2003-12-02 A one stop source for essential information on the history geography politics religion economy and culture of the fourth most populous country in the world Indonesia examines precolonial periods of the country s development as well as its independence movement It discusses the economic collapse of the 1990s and how the resultant civil chaos impacted Indonesia s present political and social problems and its neighbors This book also looks at the secessionist movements in West Papua and Aceh and the religious conflict in eastern Indonesia In addition to current events the coverage focuses on important individuals from Javanese nobles to President Sukarno whom some considered to be a Japanese collaborator during World War II This is the book to have for an intriguing and enlightening glance at Indonesia *Tree-kangaroos of Australia and New Guinea* Roger Martin, 2005-07-04 To many people the suggestion that a kangaroo could live up a tree is fantasy Yet in the rainforests of Far North Queensland and New Guinea there are extraordinary kangaroos that do just that Many aspects of these marsupials anatomy and biology suggest a terrestrial kangaroo ancestor Yet no one has so far come forward with a convincing explanation of how why and when mammals that was so superbly adapted for life on the ground

should end up back in the trees This book reviews the natural history and biology of tree kangaroos from the time of their first discovery by Europeans in the jungles of West Papua in 1826 right up to the present day covering the latest research being conducted in Australian and New Guinea Combining information from a number of disparate disciplines the author sets forth the first explanation of this apparent evolutionary conundrum *Natural History*, 1991 **The American Naturalist**, 1998 **Green Indonesia** Ilsa Sharp, 1994 Tropical rainforests covering only 7 per cent of the earth's land surface are the world's oldest ecosystem and house over 50% of all plant and animal species The Indonesian archipelago contains over 10% of the world's total rainforest area housing over 4000 species of tree 500 different mammals and 1500 bird species This beautiful and lavishly illustrated book is a celebration of Indonesia's unique and diverse rainforests their ecology biological diversity and habitants *Taxonomy, Life History and Conservation of Giant Reptiles in West Kalimantan (Indonesian Borneo)* Mark André Auliya, 2006 *Centres of Plant Diversity: Asia, Australasia, and the Pacific* Stephen D.
