

A polar bear stands on a small, isolated ice floe in a vast, open ocean. The bear is white and is looking towards the left. The ice floe is a flat, irregular shape of white ice. The water is a deep blue, and the sky is a lighter blue with some white clouds. The horizon is visible in the distance.

Planning for a Changing Climate and Its Impacts on Wildlife and Oceans United States. Congress. House. Committee on Natural Resources. Subcommittee on Fisheries, Wildlife, and Oceans, 2009

Research Handbook on Biodiversity and Law Michael Bowman, Peter Davies, Edward Goodwin, 2016-04-29 The crucial importance of biodiversity law to future human welfare is only now being fully appreciated This wide ranging Handbook presents a range of perspectives from leading international experts reflecting up to date research thinking on the vital subject of biodiversity and its interaction with law Through a rigorous examination of the principles procedures and practices that characterise this area of law this timely volume effectively highlights its objectives implementation achievements and prospects More specifically the work addresses the regulatory challenges posed by the principal contemporary threats to biological diversity the applicable general principles of international environmental law and the visions values and voices that are shaping the development of the law Presenting thematic rather than regime based coverage the editors demonstrate the state of the art of current research and identify future research needs and directions This comprehensive and authoritative Handbook will be an indispensable resource for legal scholars students and practitioners alike

The Habitats Directive in its EU Environmental Law Context Charles-Hubert Born, An Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation

Research Anthology on Environmental and Societal Impacts of Climate Change Management Association, Information Resources, 2021-10-29 Climate change is an issue that has been generating a significant amount of discussion research and debate in recent years Climate change continues to evolve at a rapid rate and

continues to have a wide array of effects on everything from temperature to plant life Beyond the negative environmental impacts climate change is also proving to be a detriment to society with increasingly violent natural disasters and human health effects It is essential to stay up to date on the latest in emerging research within this field as it continues to develop The Research Anthology on Environmental and Societal Impacts of Climate Change discusses the varied effects of climate change throughout all areas of life and provides a comprehensive dive into the latest research on key elements of society that are affected by the rapidly increasing climate Change Covering a range of topics including reproduction plants and animals and energy demand it is ideal for environmentalists policymakers environmental engineers scientists disaster and crisis management personnel professionals government officials practitioners upper level students and academics interested in emerging research on the numerous impacts of climate change

Encyclopedia of the Anthropocene, 2017-11-27 Encyclopedia of the Anthropocene Five Volume Set presents a currency based global synthesis cataloguing the impact of humanity's global ecological footprint Covering a multitude of aspects related to Climate Change Biodiversity Contaminants Geological Energy and Ethics leading scientists provide foundational essays that enable researchers to define and scrutinize information ideas relationships meanings and ideas within the Anthropocene concept Questions widely debated among scientists humanists conservationists politicians and others are included providing discussion on when the Anthropocene began what to call it whether it should be considered an official geological epoch whether it can be contained in time and how it will affect future generations Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century the term Anthropocene was only first used by ecologist Eugene Stoermer in the 1980s and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000 Presents comprehensive and systematic coverage of topics related to the Anthropocene with a focus on the Geosciences and Environmental science Includes point counterpoint articles debating key aspects of the Anthropocene giving users an even handed navigation of this complex area Provides historic seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019 This Handbook brings together the foremost authorities from around the world to provide the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries

Modification of Treaties by Subsequent Practice Irina Buga, 2018-04-04 While treaties can be notoriously difficult to amend by formal means they must nevertheless be adapted over time in order to remain useful Herein lies the role of subsequent practice as a key tool for treaty change Subsequent practice a well established means of treaty interpretation sometimes diverges from the original treaty provision to such an extent that it can no longer be said to constitute an act of interpretation or application Rather it becomes in effect one of treaty modification The modification of treaties by subsequent practice extends to all fields of international law from

the law of the sea environmental law and investment law to human rights and humanitarian law Such modifications can have significant practical consequences from revising or creating new rights and obligations to establishing new institutional mechanisms Determining when and how treaty modification by subsequent practice occurs poses difficulty to legal scholars and dispute settlement bodies alike and impacts States expectations as to their treaty obligations This significant yet underexplored process is the focus of this book Modification of Treaties by Subsequent Practice proves that subsequent practice can under carefully defined conditions that ensure strict accordance with the will of the treaty parties alter supplement and terminate treaty provisions or even entire treaty frameworks It can also generate customary law and fuel regime interaction Ultimately this book demonstrates the relevance and dynamism of the process of treaty modification by subsequent practice emphasizing the need to deal with the issue head on and explains on a theoretical and practical level how it can be identified and dealt with more consistently in the future The book thus contributes to a deeper understanding of the process of treaty modification by subsequent practice and its continued role in striking the judicious balance between the stability of treaties on the one hand and the organic evolution of the law on the other

Ecological Restoration in International Environmental Law Anastasia Telesetsky, An Cliquet, Afshin Akhtar-Khavari, 2016-12-01 Human activities are depleting ecosystems at an unprecedented rate In spite of nature conservation efforts worldwide many ecosystems including those critical for human well being have been damaged or destroyed States and citizens need a new vision of how humans can reconnect with the natural environment With its focus on the long term holistic recovery of ecosystems ecological restoration has received increasing attention in the past decade from both scientists and policymakers Research on the implications of ecological restoration for the law and law for ecological restoration has been largely overlooked This is the first published book to examine comprehensively the relationship between international environmental law and ecological restoration While international environmental law IEL has developed significantly as a discipline over the past four decades this book enquires whether IEL can now assist states in making a strategic transition from not just protecting and maintaining the natural environment but also actively restoring it Arguing that states have international duties to restore this book offers reflections on the philosophical context of ecological restoration and the legal content of a duty to restore from an international law European Union law and national law perspective The book concludes with a discussion of several contemporary themes of interest to both lawyers and ecologists including the role of private actors protected areas and climate change in ecological restoration

Forest Preservation in a Changing Climate Sébastien Jodoin, 2017-10-05 This book provides a comprehensive socio legal examination of how global efforts to fight climate change by reducing carbon emissions in the forestry sector known as REDD have affected the rights of indigenous peoples and local communities in developing countries Grounded in extensive qualitative empirical research conducted globally the book shows that the transnational legal process for REDD has created both serious challenges and unexpected opportunities for the recognition

and protection of indigenous and community rights It reveals that the pursuit of REDD has resulted in important variations in how human rights standards are understood and applied across multiple sites of law in the field of REDD with mixed results for indigenous peoples and local communities in Indonesia and Tanzania With its original findings rigorous research design and interdisciplinary analytical framework this book will make a valuable contribution to the study of transnational legal processes in a globalizing world This title is also available as Open Access **Like an Animal: Critical Animal Studies Approaches to Borders, Displacement, and Othering**, 2021-06-17

The contributors of Like an Animal challenge most fundamental concepts in the fields of racism dehumanization borders displacement and refugees that rest on the assumption of humanism They show how we can bend the arc of the moral universe toward justice at the border The goal of this interdisciplinary collection is twofold First to invite border migration studies to consider a broader social justice perspective that includes nonhuman animals Second to start a discussion if nonhumans maybe refugees of a kind and how humans can address nonhumans interests and needs from the perspective of addressing refugee issues As capitalism and the climate crisis are taking a catastrophic toll on the planet this timely volume exposes the alternative origins of violence that lie at the heart of the planet s destruction *The Law of the Sea and the Polar Regions* Erik J. Molenaar, Alex G. Oude Elferink, Donald R. Rothwell, 2013-08-15

The Law of the Sea and the Polar Regions Interactions between Global and Regional Regimes analyzes of the contemporary law of the sea and related areas of international law in Antarctica and the Arctic with a particular focus upon the interaction of global and regional regimes The global component of the international law of the sea principally the United Nations Convention on the Law of the Sea applies to the entire marine domain in both polar regions but explicitly requires regional implementation or acknowledges its usefulness This volume critically examines regional regimes for the Arctic and Antarctic on science maritime security fisheries and shipping by means of common research questions thus enabling an overall synthesis and identification of trends differences and similarities *Free-Ranging Dogs*

and Wildlife Conservation Matthew E. Gompper, 2013-10-17 Dogs are the world s most common and widespread carnivores and are nearly ubiquitous across the globe The vast majority of these dogs whether owned or un owned pure bred or stray spend a large portion of their life as unconfined free roaming animals persisting at the interface of human and wildlife communities Their numbers are particularly large throughout the developing world where veterinary care and population control are often minimal and human populations are burgeoning This volume brings together the world s experts to provide a comprehensive unifying and accessible review of the effects of dogs on native wildlife species With an emphasis on addressing how free ranging dogs may influence wildlife management and native species of conservation concern chapters address themes such as the global history and size of dog populations dogs as predators competitors and prey of wildlife the use of dogs as hunting companions the role of dogs in maintaining diseases of wildlife and the potential for dogs to hybridize with wild canid species In addition the potential role of dogs as mediators of conservation conflict is assessed including the

role of dogs as livestock guardians the potential for dogs to aid researchers in locating rare wildlife species of conservation interest and the importance of recognizing that some populations of dogs such as dingoes have a long history of genetic isolation and are themselves important conservation concerns A common theme woven throughout this volume is the potential for dogs to mediate how humans interact with wildlife and the recognition that the success of wildlife conservation and management efforts are often underpinned by understanding and addressing the potential roles of free ranging dogs in diverse natural ecosystems Free Ranging Dogs and Wildlife Conservation is aimed at professional wildlife and conservation ecologists managers graduate students and researchers with an interest in human dog wildlife interactions It will also be of relevance and use to dog welfare researchers veterinary scientists disease ecologists and readers with an interest in the interface of domestic animals and wildlife *Ecological Restoration Law* Afshin Akhtar-Khavari, Benjamin J.

Richardson, 2019-01-25 Ecological restoration is as essential as sustainable development for the health of the biosphere Restoration however has been a low priority of most countries environmental laws which tend to focus narrowly on rehabilitation of small discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes Through critical theoretical perspectives and topical case studies this book s diverse contributors explore a more ambitious agenda for ecological restoration law Not only do they investigate current laws and other governance mechanisms they also consider the philosophical and methodological bases for the law to take ecological restoration more seriously Through exploration of themes relating to time space geography semiotics social justice and scientific knowledge this book offers innovative and critical insights into ecological restoration law *Interior, Environment, and Related Agencies Appropriations for 2010* United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies, 2009 Living with Climate Change Jane A. Bullock, George D. Haddow, Kim S. Haddow, Damon P.

Coppola, 2017-08-02 The climate has changed and communities across America are living with the consequences rapid sea level rise multi state wildfires heat waves and enduring drought Living with Climate Change How Communities Are Surviving and Thriving in a Changing Climate details the steps cities are taking now to protect lives and businesses to reduce their vulnerability and to adapt and make themselves more resilient The authors included in this book have been directly involved in the successful design and implementation of community based adaptation and resilience programs *Central and Southern Florida Project* United States. Office of the Assistant Secretary of the Army (Civil Works), 2012 **Interior, Environment, and Related Agencies Appropriations for 2012** United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies, 2011 Department of the Interior, Environment, and Related Agencies Appropriations for Fiscal Year 2012 United States. Congress. Senate. Committee on Appropriations. Subcommittee on Department of the Interior, Environment, and Related Agencies, 2012 *Participatory Mangrove Management in a Changing Climate* Rajarshi DasGupta, Rajib Shaw, 2017-01-24 This book outlines the performance

and management of mangroves in the changing climatic scenario of the Asia Pacific region and draws examples and lessons from the national and community driven mangrove conservation programs of relevant countries including Pakistan India Bangladesh Sri Lanka Myanmar Thailand Cambodia Indonesia the Philippines and Japan as well as the Pacific islands By highlighting the major drawbacks that hinder effective mangrove conservation the book contributes towards enhancing climate resilience of communities through proposition of corrective methods and ameliorative approaches of mangrove conservation Mangroves play an important role in adapting to climate change and provide a plethora of ecosystem services that are fundamental to human survival Yet these ecosystems are exceptionally prone to extinction due to increased human interventions and changes in environmental boundary conditions Especially in the Asia Pacific region mangroves have dwindled at an exceptional high rate over the past three decades As the threat of climate change hovers over millions of people in this region particularly those who crowd the low lying coastal areas conservation restoration of mangroves through appropriate policies and practices remain highly imperative The primary target readers for this book are students and researchers in the fields of conservation and management of mangroves especially from the developing tropical countries of the Asia Pacific region Other target groups comprise policy planners practitioners and NGO workers who will be able to apply the collective knowledge from this work towards proactive mangrove conservation through effective mediation in local communities
