Paynter, 1959 *Wildlife Ecology and Management in Mexico* Raul Valdez, José Alfonso Ortega-Santos, 2019-01-23 Mexico is the fourteenth largest country in the world and ranks fifth in biodiversity Located in the transition zone between the temperate and tropical regions of North and South America Mexico is an important migratory corridor for wildlife and also provides wintering habitat for several species of bats monarch butterflies and temperate North American nesting birds Mexico faces several challenges to wildlife management and conservation efforts While there is increased public education and acknowledgment of the valuable benefits wildlife provides there is still much work to do to incentivize conservation efforts Fortunately there is growing recognition that Mexico's wildlife resources can be a critical component in the rural economic development of the country Bringing together an international team of wildlife experts across North America *Wildlife Ecology and Management in Mexico* provides information on the status distribution ecological relationships and habitat requirements and management of the most important game birds and mammals in Mexico It also reviews current threats and challenges facing wildlife conservation as well as strategies for resolving these issues This reference is a valuable tool for wildlife biologists wildlife management professionals and anyone interested in conserving Mexico's wealth of natural resources By laying out the challenges to conservation research editors Raul Valdez and J Alfonso Ortega S hope to encourage interdisciplinary communication and collaboration across borders *Animals and the Maya in Southeast Mexico* E. N. Anderson, Felix Medina Tzuc, 2022-09-13 In Mexico's southeastern frontier state of Quintana Roo game animals and other creatures that depend on old growth forest are disappearing in the face of habitat destruction and overhunting Traditionally the Yucatec Maya have regarded animals as fellow members of a wider society and in their religion animals enjoy the status of spiritual beings But in recent years the breakdown of cultural restraints on hunting has spiraled so far out of control that almost everything edible within easy reach of a road has become fair game This book combines the insights of an anthropologist with the hands on experience of a Maya campesino with the aim of improving the management of Quintana Roo's wild lands and animal resources E N Anderson and Felix Medina Tzuc pool their knowledge to document Yucatec Maya understanding and use of animals and to address practical matters related to wider conservation issues Although the Yucatec Maya's ethnobotany has been well documented until now little has been recorded about their animal lore Anderson and Medina Tzuc have compiled a wealth of information about traditional knowledge of animals in this corner of the Maya world They have recorded most of

the terms widely used for several hundred categories of animals in west central Quintana Roo mapped them onto biological categories and recorded basic information about wildlife management and uses The book reflects a wealth of knowledge gathered from individuals regarded as experts on particular aspects of animal management whether hunting herding or beekeeping It also offers case studies of conservation successes and failures in various communities pointing to the need for cooperation by the Mexican government and Maya people to save wildlife Appendixes provide an extensive animal classification and a complete list of all birds identified in the area Even though sustainable forestry has finally come to the Yucatán sustainable game use is practiced by only a few communities Animals and the Maya in Southeast Mexico is a complete ethnozoology for the region offered in the hope that it will encourage the recognition of Quintana Roo's forests and wildlife as no less deserving of protection than ancient Maya cities
