Will Africa Feed China:

Will Africa Feed China? Deborah Brautigam, 2015 In this clear eyed and incisive book one of the world's leading authorities on China's relationship with Africa exposes the myths and realities of the so called Chinese land grab *Will Africa Feed China?* Deborah Brautigam, 2015-10-07 In this clear eyed and incisive book one of the world's leading authorities on China's relationship with Africa exposes the myths and realities of the so called Chinese land grab *China's Relations with Africa* Joshua Eisenman, David H. Shinn, 2023-08-01 Since Xi Jinping's accession to power in 2012 nearly every aspect of China's relations with Africa has grown dramatically Beijing has increased the share of resources it devotes to African countries expanding military cooperation technological investment and educational and cultural programs as well as extending its political influence This book examines the full scope of contemporary political and security relations between China and Africa David H Shinn and Joshua Eisenman not only explain the specific tactics and methods that Beijing uses to build its strategic relations with African political and military elites but also contextualize and interpret them within China's larger geostrategy They argue that the priorities of Chinese leaders including the conflation of threats to the Communist Party with threats to the country a growing emphasis on relations in the Global South and a focus on countering U S hegemony have combined to elevate Africa's importance among policy makers in Beijing Ranging from diplomacy and propaganda to arms sales and space cooperation from increasingly frequent People's Liberation Army Navy port calls in Africa to the rising number of African students studying in China this book marshals extensive and compelling qualitative and quantitative evidence of the deepening ties between China and Africa Drawing on two decades of systematic data and hundreds of surveys and in person interviews Shinn and Eisenman shed new light on the state of China Africa relations today and consider what the future may hold **Africa through an Economic Lens** Amadou Sy, 2018-07-31 A broad vision for economic progress in Africa A more peaceful and prosperous Africa is in everyone's interest Such an Africa would translate into more trade and investment more jobs and more security for all Africa is now at a crossroads and the right path if taken could lead the continent closer to reaching its growth and human development objectives As one banker recently said it is no longer a matter of Why Africa but How Africa Using economic policy analysis this book examines the vision for achieving this idea of How Africa through the cooperative actions of the African Union Africa's private sector civil society women and youth It looks at the continent's progress in delivering on this vision specifically its ability and progress in maintaining momentum sharing the benefits of growth and financing its development The book also looks at risks and opportunities that are part of this vision such as population growth urbanization and technological changes and the role that countries such as the United States and China as well as institutional and private sector partners can play in achieving Africa's vision This book offers a vision of Africa that puts together all the pieces of the puzzle to help inform policymakers from all disciplines Policymakers and political commentators in the United States and elsewhere typically look at Africa through discrete lenses that focus on

specific elements of what is happening on the continent from security concerns to trade disputes to humanitarian crises This tendency to focus narrowly however gives a fragmented and incomplete vision of the continent A broader economic lens helps refocus the vision of Africa and is necessary if one wants to have a meaningful impact on policies to achieve sustainable and inclusive economic growth The book takes care to understand and study the vision that Africans themselves have of their continent It is also forward looking in its focus on trends and risks such as population growth rapid urbanization and technological change

China-Africa Relations Kathryn Batchelor, Xiaoling Zhang, 2017-06-26 The recent rapid growth in China's involvement in Africa is being promoted by both Chinese and African leaders as being conducted in a spirit of cooperation friendship and equality In the media and informally however a different less harmonious picture emerges This book explores how China and Africa really regard each other how official images are manufactured and how informal images are nevertheless shaped and put forward The book covers a wide range of areas where China Africa exchange exists including diplomacy technological cooperation sport culture and arts exchange The book also discusses the historical development of the relationship and how it is likely to develop going forward

Chinese Investment in Africa David N. Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent. The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa. However, most of the available material has approached this issue by looking at China as the New Colonialist, more interested in Africa's vast natural resources than working in partnership for sustained development. Whilst China's interest in Africa's resources is evident, it is just half of the story. China's foray into Africa goes beyond its appetite for natural resources and into the realm of geo-politics and international political economics. For example, China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora. Breaking free from the binary arguments and analysis which characterize this topic, Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win-win outcomes for China and Africa if Africans really know what they want from China. Hitherto, each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent. Indeed, Africa and the African Union does not yet have a coordinated policy towards China. For Africa to be able to do that, it needs to know where China is coming from, the factors that contributed to its awakening and success, and the benefits and possible pitfalls of this foray in order to better position itself for a win-win engagement with China. This book will be a valuable read for policy makers, think tanks, and students of Africa studies programmes alike.

China and Global Food Security Shaohua Zhan, 2022-11-03 In less than half a century, 1978-2020, China has transformed itself from a country that barely fed itself to a powerful player in the global food system, characterized by massive food imports, active overseas agricultural engagement, and the global expansion of Chinese agribusiness. This Element offers a nuanced analysis of China's global food strategy and its impacts on food security and the international agri-food order. To feed a population of 1.4 billion, China actively seeks overseas agri-food resources whilst maintaining a high level of domestic food production. This strategy gives China an advantageous position in the global food system, but it also creates contradictions and problems within and beyond the country. This could potentially worsen global food insecurity in the long term.

China-Africa and an Economic Transformation Arkebe Oqubay, Justin Yifu Lin, 2019 This volume considers China-Africa relations in the context of a global division of labour and power and through the history and experiences of both China and Africa. It examines the core ideas of structural transformation, productive investment, and industrialization, international trade, infrastructure development, and financing.

China's New Silk Road Dreams Noesselt Nele, 2021-11-30 The contributions compiled in this issue engage in critical evaluation of China's New Silk Road initiative, Belt and Road Initiative (BRI), by focusing on the potential long-term political and economic effects and implications for Sino-European and Sino-African relations. The authors take the launching of the BRI in October 2013 as a starting point for a general theory guided

qualitative re evaluation of the basic patterns of Chinese foreign relations and global interactions under the fifth generation of Chinese political leaders In 2013 the Chinese state president Xi Jinping framed BRI as a global connectivity network consisting of a multitude of overland passages and maritime transportation corridors Xi Jinping s report to the 19th Party Congress 2017 set the BRI as an anchor concept of China s fine tuned foreign strategy in the 21st century

Africa's Quest for Modernity Seifudein Adem,2023-03-13 This monograph addresses the complexity of China Africa and Japan Africa relations from a comparative perspective The volume is divided into five sections Section I focuses on the divergent perspectives that are reflected in the discourse on China Africa relations Section II discusses Japan s economic modernization and its potential lessons for Africa Section III compares the foreign policies of Japan and China in Africa and analyzes their supposed rivalries on the continent Section IV explores the relationship between Southeast Asia and China and its relevance to Africa China relations Section V provides an in depth case study of Ethiopia China relations over the last century The book fills a major gap in the existing literature on the triad of Africa China and Japan Under the guidance of the disciplines of African studies international relations political sociology and international political economy this volume elucidates and examines the complexities of the foreign policies of the two Asian powers toward Africa as well as their economic political and cultural underpinnings

Africa's Shadow Rise Pádraig Carmody,Peter Kragelund,Ricardo Reboredo,2020-09-17 For years economists have spoken of Africa rising and despite the global financial crisis Africa continues to host some of the fastest growing economies in the world Africa s Shadow Rise however argues that the continent s apparent economic rise is essentially a mirage driven by developments elsewhere most particularly the expansion in China s economy While many African countries have experienced high rates of growth much of this growth may prove to be unsustainable and has contributed to environmental destruction and worsening inequality across the continent Similarly new economic relationships have produced new forms of dependency as African nations increasingly find themselves tied to the fortunes of China and other emerging powers Drawing on in depth fieldwork in southern Africa Africa s Shadow Rise reveals how the shifting balance of global power is transforming Africa s economy and politics and what this means for the future of development efforts in the region Shortlisted for the Business Council for Africa s African Business Book of the Year 2023

China's Global Quest for Resources Fengshi Wu,Hongzhou Zhang,2016-11-18 The world s key resources of energy food and water which are closely connected and interdependent on each other are coming under increasing pressure as a result of increasing population development and climate change In the case of China following its recent economic surge energy food and water are already nearing the point of shortage This book considers how China is working to avoid shortages of energy food and water and the effect this is having internationally Subjects covered include domestic policy debates on China s resource strategies challenges for managing transboundary waters related to China responses from various regions and countries to China s Go Out strategy and China s increasing energy links with Russia and declining agricultural trade

with the United States The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications **China's Agricultural Investment in Australia** Michaela

Boehme, 2024-10-25 This book critically examines the driving forces, discourses and conflicts surrounding Chinese investments in overseas farmland with a specific focus on Australia With growing amounts of finance channeled into the purchase of overseas food and farming assets China has become a frontrunner in the global land rush Unlike much of the existing literature that focuses on emerging economies such as Brazil or Africa this book examines Chinese farmland purchases in the developed country context of Australia Based on four years of extensive field work in Australia and China it traces the encounters and interactions between investors, regulators, deal brokers, farmers and eaters that shape the ways in which individual Chinese investment projects materialize in the Australian countryside In contrast to conventional wisdom portraying China's overseas land rush as a state-led strategy to feed the Chinese population this book reveals that Chinese investments in Australian farmland have been propelled by the intersecting interests of international finance and business elites looking to cash in on booming Chinese demand for high quality Western food products This book provides a unique transnational perspective on China's overseas farmland purchases and shows how Chinese farmland investments produce uneven geographies of agri-food globalization that cut across national borders Through the lens of China's agri-engagement in Australia this book advances our theoretical understanding of the new types of power relations and dynamics shaping an increasingly multi-polar agri-food system This book will be useful to students and scholars of agri-food studies, Chinese studies and globalization with an interest in the global land rush and the shifting contours of the global agri-food system

Africa in Global History Toyin Falola, Mohammed Bashir Salau, 2021-12-06 This handbook places emphasis on modern contemporary times and offers relevant sophisticated and comprehensive overviews It aims to emphasize the religious, economic, political, cultural and social connections between Africa and the rest of the world and features comparisons as well as an interdisciplinary approach in order to examine the place of Africa in global history This book makes an important contribution to the discussion on the place of Africa in the world and of the world in Africa An outstanding work of scholarship it powerfully demonstrates that Africa is not marginal to global concerns Its labor and resources have made our world and the continent deserves our respect Mukhtar Umar Bunza Professor of Social History Usmanu Danfodiyo University Sokoto and Commissioner for Higher Education Kebbi State Nigeria This is a deep plunge into the critical place of Africa in global history The handbook blends a rich set of important tapestries and analysis of the conceptual framework of African diaspora, histories, imperialism and globalization By foregrounding the authentic voices of African interpreters of transnational interactions and exchanges the Handbook demonstrates a genuine commitment to the promotion of decolonized and indigenous knowledge on African continent and its peoples Samuel Olorunjoba Visiting Research Professor Institute of African Studies Carleton University **India-Africa Economic Relations in the New Global Economy** Rick

Rowden,2025-03-18 While there have been many books about China's growing economic role in Africa this book explores the much less well known story of India's growing economic role in Africa And like the big debates about China's role in Africa this book similarly asks if India is acting as a helpful development partner in Africa an exploitative new colonizer or if the answer ultimately has to do with the degree of agency exercised by African governments While the book documents the significant increase in Indian aid trade and FDI in Africa in the new millennium it also offers much more It comprehensively looks at theories of economic development the debates about the role of trade and industrial policies in economic development strategies colonial and post colonial literature and controversial features of today's global political economy as the background to study Africa and frames Africa India economic relations in these broad contexts The book reviews the history of India's diplomacy trade and investment in African countries since decolonization with a focus on the increased economic ties of the past two decades The main question examined is about the longterm impact that India's economic relations are having in African economies and if India is helping Africa to successfully develop over time or not The author examines India's economic and strategic interests in the African region and offers a comparative analysis of Africa's trade with India China the European Union and other African nations The book also explores a number of outstanding issues in India Africa relations today such as Africa's role as a source of oil gas and critical minerals needed by India the lifesaving role of Indian generic medicines across the continent the nature of the agricultural development model that India is introducing in Africa and key areas where Indian and African governments are cooperating in the international arena The book offers a critical and in depth look into the partnerships India has developed with African countries and contributes to the debate on economic relations between a more developed emerging market like India and less developed countries A major contribution to the emerging area of South South economics this book part of the Critical Political Economy of South Asia series will be useful for scholars and researchers of economics development economics development studies public policy diplomacy African studies political economy South Asian economics and international politics and trade
