William Blake Michael Davis,2023-12-22 **Melville's Philosophies** Branka Arsic,K. L. Evans,2017-05-18 Melville's Philosophies departs from a long tradition of critical assessments of Melville that dismissed his philosophical capacities as ingenious but muddled Its contributors do not apply philosophy to Melville in order to detect just how much of it he knew or understood To the contrary they try to hear the philosophical arguments themselves often very strange and quite radical that Melville never stopped articulating and reformulating What emerges is a Melville who is materialistically oriented in a radical way a Melville who thinks about life forms not just in the context of contemporary sciences but also ontologically Melville's Philosophies recovers a Melville who is a thinker of great caliber which means obliquely but dramatically reversing the way the critical tradition has characterized his ideas Finally as a result of the readings collected here Melville emerges as a very relevant thinker for contemporary philosophical concerns such as the materialist turn climate change and post humanism

Judgment and Strategy Robin Holt,2018-01-19 Holt argues strategy is the process by which an organization presents itself to itself and others To bring this about exponents of strategic inquiry attempt to gather knowledge about the conditions

in which any organization is being organized emerging markets restless geo political environments networks of technological ordering populations with differing skill sets and the like The upshot of such inquiry is a succession of images by which an organization attains distinction as a unity or self Using work from literature art and philosophy Holt explores what it means to present such an organizational self In strategy practice he identifies three related forms of presentation First comes strategy as a project of representational knowledge Here strategists generate accurate timely and complex information to build successive images of the organization and its place in the world Though pervasive and persistent these overtly technical images remain subject to the basic skeptical challenge that things could be otherwise In response come the second and third forms of self presentation the creation of visionary images or assertions of competitive brute will Here too come problems With vision comes the risk of collective thoughtlessness and with brute will a one dimensional condition of acquisitive competition Holt suggests judgment offers another way of responding to the skeptics challenge Tracing a narrative through the ideas of David Hume Immanuel Kant Adam Smith William Shakespeare William Hazlitt Hannah Arendt Stanley Cavell Harold Pinter Virginia Woolf Martha Nussbaum and others Holt finds much might be gained from associating strategic inquiry with a form of critical or poetic spectating It is he argues by having this un homely sense of being besides oneself that an organization can best present itself to itself and others
