Collaboration Strategy Felix Barber,Michael Goold,2014-09-25 Current strategy thinking focuses on what to do not how to motivate employees suppliers and business partners to do it Whether working with employees or with external suppliers companies are increasingly stumbling with implementing strategy But why is this happening And how can we address it Collaboration Strategy argues that motivating people and companies is fundamental to business success In the activities that matter most in today s economy design development marketing sales projects it is hard to define just what you want done Setting up business activities to get the results you want becomes a strategic challenge In industries from pharmaceuticals to fashion software to stock exchanges new ways of working with partners that break down traditional company boundaries and establish new roles and relationships have enabled businesses to grow rapidly and achieve superior profits At the heart of this book Felix Barber and Michael Goold have combined their considerable expertise to present a complete and original collaboration framework based on their findings over a seven year period in which they interviewed

over 200 businesses The framework explains how to set up to get the results you want for a range of different activities and industries They present the 10 requirements needed for profitable collaboration and use real life scenarios to apply their framework and analysis offering a menu of tactics to address the most common problems in setting up collaboration with partners Essentially you must design a basis for working together or collaboration with your employees and suppliers that will get them to do what you want

KI 2009: Advances in Artificial Intelligence Bärbel Mertsching, Marcus Hund, Zaheer Aziz, 2009-09-29 The 32nd Annual German Conference on Artificial Intelligence KI 2009 KI being the German acronym for AI was held at the University of Paderborn Germany on September 15-18 2009 continuing a series of successful events Starting back in 1975 as a national meeting the conference now gathers researchers and developers from academic fields and industries worldwide to share their research results covering all aspects of artificial intelligence This year we received submissions from 23 countries and 4 continents Besides the international orientation we made a major effort to include as many branches of AI as possible under the roof of the KI conference A total of 21 area chairs representing different communities within the field of AI selected further members of the program committee and helped the local organizers to acquire papers The new approach appealed to the AI community we had 126 submissions which constituted an increase of more than 50% and which resulted in 14 parallel sessions on the following topics agents and intelligent virtual environments AI and engineering automated reasoning cognition evolutionary computation Robotics experience and knowledge management history and philosophical foundations knowledge representation and reasoning machine learning and mining natural language processing planning and scheduling spatial and temporal reasoning vision and perception offering cutting edge presentations and discussions with leading experts Thirty one percent of the contributions came from outside German speaking countries
