

# Using Windows Movie Maker

## About the menu bar and toolbar

You can use the commands in the menu bar to perform tasks in Windows Movie Maker. The procedures for completing tasks are described throughout Help by using the menu commands.

The toolbar provides an alternative to selecting commands on the menus. You can use the toolbar to perform common tasks quickly.

To show or hide the toolbar, on the **View** menu, click **Toolbar**. A check mark appears next to the **Toolbar** command on the menu when the toolbar is displayed.

## About the storyboard

The storyboard is the default view in Windows Movie Maker. You can use the storyboard to look at the sequence or ordering of the clips in your project and easily rearrange them, if necessary. This view also lets you see any video effects or video transitions that have been added. You can also preview all of the clips in your current project. Audio clips that you have added to a project are not displayed on the storyboard; however, they are displayed in the timeline.

## About the timeline

You can use the timeline to review or modify the timing of clips in your project. Use the timeline buttons to perform tasks such as changing the view of your project, zooming in or out on details of your project, recording narration, or adjusting the audio levels. The time is displayed as hours:minutes:seconds/hundredths of a second (hh:mm:ss.ffff). To trim unwanted portions of your clip, use the trim handles, which appear when you select a clip. You can also preview all of the clips in your current project which are displayed on the timeline.
