**Wines & Vines** H. F. Stoll, 2013 **Exploring Winery Visitors in the Emerging Wine Region of Wisconsin and Minnesota** Jenni Lee, 2017 **Illinois Wines and Wineries** Clara Orban, 2014-06-30 For more than a century Illinois has been home to a blossoming wine culture yet winemaking in the state has not received the attention it deserves Now Clara

Orban has created the ultimate companion to Illinois wines and wineries. This illustrated volume is a comprehensive yet user-friendly guide for both experienced wine lovers and amateur oenophiles. Orban, a certified sommelier, begins with the history of Illinois wine production and wineries. She then enlightens readers on such wine basics as the most common grapes grown in Illinois, optimal food and wine pairings, the tenets of wine tasting, and provides an overview of the world of labels, bottles, and corks. The fascinating science of wine also is discussed, including the particulars of Illinois soil and climate and their effect on the industry. Orban then provides a guide to all the wineries listed by the Illinois Grape Growers and Vintners Association. For each winery, she offers a succinct history, information regarding the variety of grapes used, hours of operation, location, and contact information. In addition to providing readers with a background of the state's industry and snapshots of individual wineries, *Illinois Wines and Wineries* provides a glossary of key wine terms, including those specific to the state of Illinois, as well as color photos and a map to each location visited in the book. This sophisticated yet practical guidebook is an essential resource for connoisseurs and casual enthusiasts alike who are interested in exploring Illinois's rich winemaking legacy.

**Fermented Landscapes** Colleen C. Myles, 2020-04-01 *Fermented Landscapes* applies the concept of fermentation as a mechanism through which to understand and analyze processes of landscape change. This comprehensive conceptualization of fermented landscapes examines the excitement, unrest, and agitation evident across shifting physical, environmental, and sociocultural landscapes as related to the production, distribution, and consumption of fermented products. This collection includes a variety of perspectives on wine, beer, and cider geographies, as well as the geography of other fermented products, considering the use of local materials in craft beverages as a function of neolocalism and sustainability, and the nonhuman elements of fermentation. Investigating the environmental, economic, and sociocultural implications of fermentation in expected and unexpected places and ways allows for a complex study of rural-urban exchanges or metabolisms over time and space, an increasingly relevant endeavor in socially and environmentally challenged contexts, global and local.
