Yangtze River Gunboats 1900-49 New Vanguard:

Yangtze River Gunboats 1900-49 Angus Konstam, 2012-12-20 From the end of the 19th century through the first half of the 20th most Western powers maintained a naval presence in China. These gunboats protected traders and missionaries, safeguarded national interests, and patrolled Chinese rivers in search of pirates. It was a wild, lawless time in China as ruthless warlords fought numerous small wars to increase their power and influence. This book covers the gunboats of all the major nations that stationed naval forces in China, including America, Britain, France, Germany, Italy, Portugal, and Japan, and looks at such famous incidents as the Japanese bombing of the USS Patay and the dramatic escape of the HMS Amethyst from Communist forces in 1947, which marked the end of the gunboat era. German Commerce Raiders 1914-18 Ryan K. Noppen, 2015-11-20 This is the story of Germany's commerce raiders of World War I, the surface ships that were supposed to starve the British Isles of the vast cargoes of vital resources being shipped from the furthest reaches of the Empire. To that end, pre-war German naval strategists allocated a number of cruisers and armed fast ocean liners, as well as a complex and globe-spanning supply network to support them, known as the Etappe network. This book, drawing on technical illustrations and the author's exhaustive research, explains the often overlooked role that the commerce raiders played in World War I. Whilst exploring the design and development of the ships, it also describes their operational history, how they tied up a disproportionate amount of the British fleet on lengthy pursuits, and how certain raiders, such as the SMS Emden, were able to wreak havoc across the oceans. **Imperial Japanese Navy Destroyers 1919-45 (1)** Mark Stille, 2013-03-20 A detailed illustrated look at the earliest seven classes of destroyer fielded by the Imperial Japanese Navy of World War II. Several classes of Japanese destroyer were built before the war. This includes the famous Fubuki class, called Special Type by the Japanese, which were when completed in the late 1920s the most powerful class of destroyers in the world. This design forced all other major navies to follow suite and provided the basic design for the next many classes of Imperial Navy destroyers. This book also examines the three classes built before the Special Type, which were based on a German World War I design, as well as two classes built afterward. Pacific War expert Mark Stille evaluates the success of these designs from the first battles of the Pacific War up until the death sortie of the superbattleship Yamato and compares them to similar Allied destroyer designs. British Motor Gun Boat 1939-45 Angus Konstam, 2013-03-20 Motor Gun Boats were the Spitfires of the Seas of the Royal Navy. Bristling with small calibre guns and machine guns, they served in a variety of roles during the War. In the early war period, they battled against German E-boats in the English Channel, then went on the offensive, searching the enemy shore for targets of opportunity. At other times, they ran support for Motor Torpedo Boats and were used to deliver commandos on various raids. Naval Warfare expert Angus Konstam tells the story of these small but destructive boats, beginning with their design and development and carrying through to their operational use in both the European and Mediterranean theatres of World War II. **Imperial Japanese Navy Destroyers 1919-45 (2)** Mark Stille, 2013-09-20

During the Pacific War the most successful component of the Imperial Japanese Fleet was its destroyer force. These ships were larger and in most cases better equipped than their Allied counterparts. Armed with a powerful long ranged torpedo these ships proved formidable opponents. Initially they were instrumental in an unbroken string of Japanese victories but it was not until the Guadalcanal campaign that these ships fully demonstrated their power. In a series of daring night actions they devastated Allied task forces with their deadly torpedoes. This volume details the history, weapons and tactics of the Japanese destroyers built just before and throughout the war including the famous Kagero and Yugumo classes, the experimental destroyer Shimakaze that boasted a top speed of almost 40 knots and 15 torpedo tubes and the Matsu class that represented the Japanese equivalent to an Allied destroyer escort. These ships were designed to be built quickly and cheaply but proved to be very tough in combat.

British Battleships 1914-18 (1) Angus Konstam, 2013-05-20 The launch of HMS Dreadnought in 1906 changed the face of naval warfare. The first half dozen dreadnoughts were all improvements of the basic Dreadnought design, all carrying ten 12 inch guns. It was only in 1911 with the launch of HMS Neptune that the layout of this powerful armament was altered as a result of practical experience. Two more versions of the Neptune entered service later that same year. These nine improved dreadnoughts formed the core of the British High Seas Fleet. This book, the first of two volumes covering these famous warships, uncovers the full story of the British battleships of World War I. It examines their revolutionary design, the 12 inch guns that provided them with their firepower and the way these guns were fired in anger.

T-34-85 Medium Tank 1944-94 Steven J. Zaloga, Jim Kinnear, 2013-08-20 The T 34 85 tank is one of those rare weapons that have remained in service for more than half a century. First introduced in 1944, it has seen combat in nearly every corner of the globe. Alongside detailed illustrations, Steven Zaloga and Jim Kinnear look at this long serving Soviet tank at length, including its operational history, design and development and later modifications. Although long obsolete in Europe, it has proven a reliable and potent weapon in many conflicts in lower income countries and is still in service with more than a dozen armies around the world.

T-72 Main Battle Tank 1974-93 Steven J. Zaloga, 2013-08-20 The Russian T 72 Ural tank was the most widely deployed main battle tank of its generation. Used by the armies of the former Warsaw pact and Soviet Union, it has also been exported in large numbers to many of the states in the Middle East. This book reveals the previously secret history behind the tank. Steven J. Zaloga examines the conditions under which the T 72 was designed and produced. Technical aspects of the weapon are also discussed, including its EDZ reactive armour which, when it first appeared in December 1984, gave NATO a nasty shock.

M4 (76mm) Sherman Medium Tank 1943-65 Steven J. Zaloga, 2013-08-20 The M4 Sherman tank was the mainstay of the Western allies between 1942 and 1945. Fast and modern, it was a big success and was transported as far afield as Russia and North Africa. The American Chief of Staff claimed in November 1943 it was hailed widely as the best tank on the battlefield. However, by the Normandy invasion of June 1944, this was not the case: the new German heavy tanks such as the Panther and Tiger were completely outclassing the Sherman. This illustrated book

covers the M4 version armed with the 76 mm gun examining developments such as the HVSS suspension using much new archive material **T-34/76 Medium Tank 1941-45** Steven J. Zaloga,2013-08-20 The T 34 was the most influential tank design of World War 2 When first introduced into combat in the summer of 1941 it represented a revolutionary leap forward in tank design Its firepower armour protection and mobility were superior to that of any other medium tank of the period This superiority did not last long While the T 34 underwent a series of incremental improvements during 1943 it was being surpassed by new German tank designs most notably the Panther This compact illustrated guide traces the life of the original T 34 through all its difficulties to eventual success Gunboats of World War I Angus Konstam,2015-04-21 From the Mediterranean to the Black Sea from the Balkans to Mesopotamia gunboats played an influential part in the story of World War I This detailed technical guide to the gunboats of all the major navies of the war means that for the first time the story can be told Naval action in World War I conjures up images of enormous dreadnoughts slugging it out in vast oceans Yet the truth is that more sailors were killed serving on gunboats and monitors operating far from the naval epicentre of the war than were ever killed at Jutland Gunboat engagements during this war were bloody and hard fought if small in scale Austrian gunboats on the Danube fired the first shots of the war whilst German British and Belgian gunboats fought one of the strangest most intriguing naval campaigns in history in far flung Lake Tanganyika *Gunboat on the Yangtze* Glenn F.
