The Routledge Handbook of Language Education Curriculum Design Peter Mikan, Ilona Wallace, 2019-12-23 Curriculum design options cover a continuum from regional and school based programs to national and international frameworks. How does policy speak to practice? What have teacher researchers discovered through classroom studies? Where do you begin to describe or measure effective language education curriculum design? The Routledge Handbook of Language Education Curriculum Design presents a comprehensive collection of essays on these issues by 31 established practitioners and new researchers. Informed by experienced scholarship and fresh studies, this handbook shares international perspectives on language education from policy and curriculum to teacher training and future directions. The handbook addresses language education curriculum design across five sections: Language curriculum design perspectives, policies and practices; Designs across the curriculum; Curriculum designs in language education; Curriculum resources, evaluation and assessment; Teacher education research and future projects. With contributions from Australia, Brazil, Indonesia, Switzerland, Timor-Leste and more, the handbook represents the breadth of research into and the global implications for sound language education curriculum design. It considers equally the needs of students and policy makers from urban metropolises and remote communities. It is designed to reinvigorate discussions about education policy, curriculum management and the role of teacher researchers.

Understanding Reading Comprehension Wayne Tennent, 2025-11-05 Reading comprehension is a vital part of literacy that all primary school teachers need to understand. Drawing from educational and psychological research, this book offers a detailed analysis of how reading comprehension happens, combined with practical teaching strategies for the classroom. This heavily revised second edition explores the underlying linguistic and cognitive processes that support comprehension, from inference making to the role of metacognition. It builds on this procedural knowledge to examine text selection, classroom pedagogy and how to assess comprehension. This is essential reading for primary English modules on initial teacher education courses, including university-based PGCE, BA with QTS, BEd and school-based SCITT. Teach First routes into teaching and also for current teachers wishing to further develop their knowledge.
