Architectural Record ,1984 Wood Burning for Power Production ,1979 The wood fired boiler at the Vermont State Hospital in Waterbury Vermont was investigated in order to identify environmental and economic problems associated with increased use of wood as fuel The investigators observed that the low amount of stack emissions contained particulates that were extremely effective light scatterers An analysis of the entire system was performed in order to investigate the particulate growth and the conversion of gaseous material to particulates within the system Initial findings indicate that a good deal of particulate formation takes place within and after the cyclone thus rendering the cyclone somewhat ineffective in this system Meteorological data were acquired in the vicinity of the experimental site Background concentrations were

measured using hi vol samplers and a Tracer experiment was performed to indicate the direction of plume travel These data were incorporated into the Los Alamos Visibility Model to simulate the actual appearance of the plume with a variety of boiler sizes This simulation gives one an indication of how large a boiler sited in this location can be before the opacity of the plume becomes aesthetically offensive An economic assessment of the wood burning activities at Waterbury and a number of other sites is included in this report *Competitive Energy Management & Environmental Technologies* ,1995 This text documents strategies for energy cost reduction in commercial institutional industrial and government buildings Emphasis is placed on the integration of energy and environmental technologies which aim to reduce global warming improve indoor air quality and meet CFC phaseout requirements In addition competitive power issues are addressed and their impact on new power generation technologies and demand side management alternatives **Ohio Architect** ,1960 **Plant Management and Engineering** ,1952 **Heating, Ventilating, Air Conditioning Guide** ,1955 **Wood & Wood Products** ,1983 *The Architectural Forum* ,1952 **American Society of Heating and Ventilating Engineers Guide** ,1948 The Northern Logger and Timber Processor ,1978 **Fueloil & Oil Heat** ,1952 **Textile Industries** ,1958
