HUSAIN, 2021-08-05 This book attempts to

explore the emergence of science fiction as a genre and its development into steampunk as a subgenre of science fiction in selected science fiction novels Mary Shelley's *Frankenstein* 1823 Stanislaw Lem's *Solaris* 1970 and K W Jeter's *Infernal Devices* 1987 This research shows that the scientists in these novels drag themselves into darkness Victor the protagonists of *Frankenstein* is an ambition scientist who wants to conquer death but tragically loses his family during this endeavor Kelvin the hero of *Solaris* is psychologically devastated when he struggles to understand how *Solaris* ocean creates a simulation of people The hero of the third novel George Dewar's father a mad scientist and inventor creates a double of his own son as a robot tries to destroy the earth The main argument of this research is that all these novels set in different eras draw on science fiction to criticize and question man's greedy and unrestricted desire for scientific discovery to the extent that they want to conquer the universe and play the role of God The study will ask the following questions How do the ambitious scientists in the novels drag themselves into madness And how does the scientific desire turn into a crave for transcendence bringing about their damnation What do these scientific explorations and inventions reveal about human nature Does steampunk bring evolution to the future as a sub genre of science fiction *Arcadia (SparkNotes Literature Guide)*
