Assessment-Centered Teaching Kathryn DiRanna, 2008-03-07 Valuable for practitioners who wish to improve their teaching and their students' learning and for researchers concerned with putting ideas of formative assessment into teaching practice. Richard J. Shavelson, Margaret Jack, Professor of Education, Stanford University. Drawing from conceptual principles and empirical findings that establish the crucial role of ongoing formative assessment, the authors describe a professional development framework and program that prepares teachers to adjust their teaching to student thinking in the moment and to refine assessments to better reveal students' understandings throughout instruction. Joan I. Heller, Director, Heller Research Associates. A reflective process for integrating assessment and instruction. Because assessment and instruction are two sides of the same coin, it is critical for teachers to not only assess what students understand but also use that information to adjust their teaching. Assessment-Centered Teaching ACT is a unique practice that allows teachers to gather information during instruction to uncover learning gaps and guide students toward deeper understandings of complex ideas. Suitable for all grade levels, this resource describes how reflective practitioners can use the ACT portfolio to reflect on, modify, and improve their curriculum and instruction. The forms included on the CD-ROM guide
