Spezio, 2012-03-12 The field of religion and science is one of the most exciting and dynamic areas of research today This Companion brings together an outstanding team of scholars to explore the ways in which science intersects with the major religions of the world and religious naturalism The collection provides an overview of the field and also indicates ways in which it is developing Its multicultural breadth and scientific rigor on topics that are and will be compelling issues in the first part of the twenty first century and beyond will be welcomed by students and scholars alike

Beyond Cutting Edge? Paul C. Heidebrecht, 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder s thought by emphasizing that the church also plays a crucial role in our moral formation

AI, Faith, and the Future Michael J. Paulus, Michael D. Langford, 2022-06-17 Artificial intelligence is rapidly and radically changing our lives and world This book is a multidisciplinary engagement with the present and future impacts of AI from the standpoint of Christian faith It provides technological philosophical and theological foundations for thinking about AI as well as a series of reflections on the impact of AI on relationships behavior education work and moral action The book serves as an accessible introduction to AI as well

as a guide to wise consideration design and use of AI by examining foundational understandings and beliefs from a Christian perspective

Stem Cell Research Janet T. Arnes, 2006 Embryonic stem cells have the ability to develop into virtually any cell in the body and may have the potential to treat medical conditions such as diabetes and Parkinson s disease In August 2001 President Bush announced that for the first time federal funds would be used to support research on human embryonic stem cells but funding would be limited to existing stem cell lines The National Institutes of Health NIH has established the Human Embryonic Stem Cell Registry which lists stem cell lines that are eligible for use in federally funded research Although 78 cell lines are listed 21 embryonic stem cell lines are currently available Scientists are concerned about the quality longevity and availability of the eligible stem cell lines For a variety of reasons many believe research advancement requires new embryonic stem cell lines and for certain applications stem cells derived from cloned embryos may offer the best hope for progress in understanding and treating disease A significant cohort of pro life advocates support stem cell research those opposed are concerned that the isolation of stem cells requires the destruction of embryos Letters from Congress one signed by 206 Members of the House and a second signed by 58 Senators have been sent urging President Bush to expand the current federal policy concerning embryonic stem cell research Some have argued that stem cell research be limited to adult stem cells obtained from tissues such as bone marrow They argue that adult stem cells should be pursued instead of embryonic stem cells because they believe the derivation of stem cells from either embryos or aborted fetuses is ethically unacceptable Other scientists believe adult stem cells should not be the sole target of research because of important scientific and technical limitations Groups make ethical distinctions in the debate on how to proceed with stem cell research based upon embryo protection relief of suffering viability the purpose and timing of embryo creation and destruction donor consent scientific alternatives federal funding and
