Waiting Happen Sociology Unexpected Injuries:

Sociology of Waiting Paul Christopher Price, 2021-05-04 In *Sociology of Waiting* Paul Christopher Price investigates how people wait and analyzes what individuals do while waiting. It is a key feature within U.S. and other societies; waiting is universal. Sociologically, waiting gets at order and our ability or inability to pause. Crowds cannot rush into concert venues and supermarket clerks cannot check out customers simultaneously. So we must wait. In all our waiting, we've developed strategies and structures for delays and such methods and structures provide order as well as understanding; we recognize why we wait. The sociology of waiting is a classic piece of everyday sociology, a timeless piece of routine behavior. Waiting is as natural as breathing, eating, and drinking; indeed, mothers wait nine months before infants are brought to term and summer will always follow spring. Waiting provides its own lessons. That is, watching cars weave through traffic and receive citations by police, we learn that waiting may have saved time and money. Shining the light on waiting permits a far superior understanding of order and how our society organizes itself around taking turns. Waiting is a matter that takes up much of our valuable time and resources; consequently, reducing wait time has become big business.

Corruption and the Management of Public Safety Simon Ashley Bennett, 2024-03-05 Graft is a common and persistent social pathogen that afflicts the developed and developing world in equal measure. This book describes, through the medium of international case studies, how graft undermines public safety and how following a near miss incident or accident, investigators can use actor network theory (ANT) to ascertain to what degree and through what mechanisms graft contributed to the event. The book introduces the reader to graft through a variety of case studies and explains how graft works against the public interest. The relatable case studies include the 1989 Hillsborough football stadium disaster, 2007 Air Canada crash, 2015 ongoing Volkswagen diesel emissions scandal, and 2020 Beirut ammonium nitrate explosion, Lebanon. It demonstrates the threat graft poses to public safety, economic success, and corporate and national reputation. By the end of the book, the reader will understand the nature and extent of the problem of graft, how graft undermines safety, confidence, and reputation, and how ANT can be used to identify and quantify graft in respect of the governance of technological systems and to ascertain to what degree and through what mechanisms graft contributed to a near miss incident or accident. Primarily aimed at an academic audience, this book will offer essential insights to students, researchers, and faculty within the fields of risk, crisis, and disaster management, as well as corporate governance and safety. The accessible nature of the book will also appeal to safety practitioners, risk managers, and accident investigators.

Waiting to Happen Lorne Tepperman, Nicole Meredith, 2016 Lorne Tepperman and Nicole Meredith evaluate the research on unexpected injury rates across the world with a particular focus on Canada, before delving in more detail into how these injuries are patterned and how we may use our knowledge of that patterning to improve public health and safety.
