Walter Benjamin's Antifascist Education Tyson E. Lewis, 2020-02-01 Walter Benjamin's Antifascist Education is the first comprehensive analysis of educational themes across the entirety of the critical theorist's diverse writings Starting with Benjamin's early reflections on teaching and learning Tyson E. Lewis argues that the aesthetic and cultural forms to which Benjamin so often turned namely radio broadcasts children's theatrical productions collections cityscapes public cinemas and word games swell with educational potentialities What emerges from Lewis's reading is a constellational curriculum composed of minor practices such as poor teaching absentminded learning and nondurational studying This curriculum carries political significance offering an antidote to past and present forms of fascist manipulation hardness and coldness Walter Benjamin's Antifascist Education is a testimony to Benjamin's belief that everyone is an educator and everyone needs to be educated and everything is education

Agamben and the Signature of Astrology Paul Colilli, 2015-10-16 The work of Giorgio Agamben one of the world's most important living philosophers has been the object of much scrutiny Yet there is one dimension of his thought that remains unexamined by scholars the presence of the ancient science of astrology in his writings This book the first of its kind identifies the astrological elements and explains the implications of their usage by Agamben In so doing this study challenges us to imagine Agamben's thought in a radically new light A critical account of the presence of astrology and related themes in Agamben's writings ranging from the earlier works to the more recent publications illustrates that the astrological signature constitutes a mode of philosophical archaeology that allows for an enhanced understanding of concepts that are central to his works such as potentiality the signature bare life and biopolitics

Adorno's Critique of Political Economy Dirk Braunstein, 2022-11-21 To this day there persists a widespread assumption that Adorno's references to Marx and especially to Marx's critique of political economy represent a relic from an early and short-lived stage of Adorno's theoretical development On the basis of relevant and largely unpublished textual sources this book refutes this thesis while showing that the centre of Adorno's critical theory of society is occupied by a critique not only of political economy but of economy in general

Totalitarian Space and the Destruction of Aura Saladdin Ahmed, 2019-02-14 We live today within

a system in which state and corporate power aim to render space flat transparent and uniform for only then can it be truly controlled The gaze of power and the commodity form are capable of infiltrating even the darkest of corners and often we invite them into our most private spaces We do so as a matter of convenience but also to placate ourselves and cope with the alienation inherent in our everyday lives The resulting dominant space can best be termed totalitarian It is space stripped of uniqueness deprived of the spatial aura necessary for authentic experience In *Totalitarian Space and the Destruction of Aura* Saladdin Ahmed sets out to help us grasp what has been lost before no trace remains He draws attention to that which we might prefer not to see but despite the bleakness of this indictment of reality the book also offers a message of hope Namely it is only once we comprehend the magnitude of the threat to our spatial experience and our own complicity in sustaining this system that we can begin to resist the totalizing forces at work
