ornamentation in Mozart from rigorism that has resulted from confusing the pure abstraction of ornament tables with concrete musical situations The second part deals with pitches that were not written in the score yet often intended to be added when Mozart left white spots in his notation These additions range from single notes to lengthy cadenzas The problem addressed is the question of where such additions are possible or necessary and how they might best be designed Professor Neumann draws on an immense knowledge of the literature written during Mozart s time and on his own comprehension of the subtleties of Mozart s music and musical styles Refusing to interpret the sources dogmatically he frees performers of Mozart from the rigid principles too often imposed by modern scholars Frederick Neumann is Professor of Music Emeritus at the University of Richmond Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
