Aviation Maintenance Management Introduction:

Risk Management and Error Reduction in Aviation Maintenance Manoj S. Patankar, James C. Taylor, 2017-03-02

Although several U S and European airlines have started providing human factors training to their maintenance personnel the academic community some 300 academic programs in the United States and several others in Europe and Asia has not yet started offering formal human factors education to maintenance students The highly respected authors strongly believe in incorporating the human factors principles in aviation maintenance This is the first of two volumes providing effective behavioural guidance on risk management in aviation maintenance for both the novice and the experienced maintenance personnel Its practical guidelines assist both student and practising aviation maintenance personnel to develop sustainable safety culture For the maintenance community it provides some theoretical discussion about the Why for risk management and then focus on the How to implement a successful error reduction program To help the maintenance community in making a strong case to their financial managers the authors also discuss the return on investment for risk management programs The issue of risk management is taken at two levels First it provides a basic awareness information to those who have little or no knowledge of maintenance human factors Second it provides a set of practical tools for the more experienced people so that they can be more effective in risk management and error recovery in their jobs This invaluable book serves as a practical guide as well as an academic textbook The book covers fundamental human factors principles from a risk management perspective Upon reading this informative book the audience will be able to apply the basic principles of risk management to aviation maintenance environment and they will be able to use low risk behaviours in their daily work

Industrial Aviation Management Martin Hinsch, 2019 This book outlines the structure and activities of companies in the European aviation industry The focus is on the design production and maintenance of the components assemblies engines and the aircraft itself In contrast to other industries the technical aviation industry is subject to many specifics since its activities are highly regulated by the European Aviation Safety Agency EASA the National Aviation Safety Authorities and by the aviation industry standard EN 9100 These regulations can influence the companies organization personnel qualification quality management systems as well as the provision of products and services This book gives the reader a deeper up to date insight into today's quality and safety requirements for the modern aviation industry Aviation specific interfaces and procedures are looked at from both the aviation legislation standpoint as well as from a practical operational perspective Dr Martin Hinsch has over 15 years of aviation industry experience He worked for Lufthansa Technik in Germany Switzerland and the Middle East focusing on Process Quality Management He holds a Professorship in Aviation Management is a certified aerospace auditor according to EN 9100 and he is also the CEO of AeroImpulse Aerospace Consulting Dr Hinsch has authored several books on aviation management to critical acclaim *Essentials of Aviation Management* Julie F. Rodwell, 2003 *Aviation Information Management* Barbara G. Kanki, 2017-03-02 Operational information management is at

a crossroads as it sheds the remaining vestiges of its paper based processes and moves through the uncharted domain of electronic data processes The final outcome is not yet in full focus but real progress has been made in the transition to electronic documents providing the aviation industry with a clear direction This book looks at a combination of industry initiatives and airline successes that point to the next steps that operators can take as they transition to fully integrated information management systems Although the route has not been fully identified it is evident that a key to successful long term efficient information management is industry wide cooperation The chapters are authored by a range of experts in operational information management and collectively they outline ways that operators can improve efficiency across flight ground and maintenance operations Considerations and recommendations are identified and presented addressing the following priorities Safety critical information and procedures Human factors Information security Operational information standardization The readership includes Airline flight operations managers and standards personnel Airline operating documents and publication specialists Airline information managers Commercial pilots Airline maintenance managers and personnel Manufacturers and vendors of aviation products Aviation regulators and policy makers Aviation researchers and developers of information technologies and Military technical publications specialists

Safety Management Systems for Aviation Practitioners Kent Hollinger, 2013 Based on the highly successful Safety Management Systems SMS Principles Theory and Application course taught by the MITRE Aviation Institute The International Civil Aviation Organization ICAO has required all countries to mandate SMS for their aviation service providers including air operators airports air traffic services and maintenance organizations Design and manufacturing organizations will also be required to comply These organizations need not only the theory of SMS but practical examples of how they can make SMS work in their organizations From publisher description
