construction of types of crime and then formulates and utilizes a useful typology of criminal behavior systems. It classifies crime into seven categories among them violent personal crime, occasional property crime, public order crime, occupational crime, corporate crime, organized crime, and political crime. The new edition looks at the criminal landscape of the twenty-first century, capturing both the numerous advancements in theory and research in the field of criminology as well as many societal changes that have taken place in law, mass media, the economy, culture, and the political system that directly affect the book's coverage of various types of crimes. A global perspective broadens the book's relevance to include a variety of different societies. Crimes newly examined in this edition include identity theft, domestic violence, arson, hate crimes, cybercrime, campus sexual assault, police brutality, Ponzi schemes, human trafficking, and terrorism. Finally, alternatives to conventional criminal justice are considered, including such approaches as peacemaking, restorative justice, private justice, problem solving, harm reduction, naming and shaming, and internal and external controls.
