Rhetorical Touch Shannon Walters, 2014-10-20 Rhetorical Touch argues for an understanding of touch as a rhetorical art by approaching the sense of touch through the kinds of bodies and minds that rhetorical history and theory have tended to exclude In resistance to a rhetorical tradition focused on shaping able bodies and neurotypical minds Shannon Walters explores how people with various disabilities psychological cognitive and physical employ touch to establish themselves as communicators and to connect with disabled and nondisabled audiences In doing so she argues for a theory of rhetoric that understands and values touch as rhetorical Essential to her argument is a redefinition of key concepts and terms the rhetorical situation rhetorical identification and the appeals of ethos character pathos emotion and logos logic or message By connecting Empedoclean and sophistic theories to Aristotelian rhetoric and Burkean approaches Walters s methods mobilize a wide range of key figures in rhetorical history and theory in response to the context of disability Using Empedocles tactile approach to logos Walters shows how the iterative writing processes of people with psychological disabilities shape crucial spaces for identification based on touch in online and real life spaces Mobilizing the touch based properties of the rhetorical practice of *mētis* Walters demonstrates how rhetors with autism approach the crafting of ethos in generative and embodied ways Rereading the rhetorical practice of *kairos* in relation to the proximity between bodies Walters demonstrates how writers with physical disabilities move beyond approaches of pathos based on pity and inspiration The volume also includes a classroom based exploration of the discourses and assumptions regarding bodies in relation to haptic or touch based technologies Because the sense of touch is the most persistent of the senses Walters argues that in contexts of disability and in situations in which people with and without disabilities interact touch can be a particularly vital instrument for creating meaning connection and partial identification She contends that a rhetoric thus reshaped stretches contemporary rhetoric and composition studies to respond to the contributions of disabled rhetors and transforms the traditional rhetorical appeals and canons Ultimately Walters argues a rhetoric of touch allows for a richer understanding of the communication processes of a wide range of rhetors who use embodied strategies
