Marcan Priority Without Q John C. Poirier, Jeffrey Peterson, 2015-02-26 This book discusses the composition of the synoptic gospels from the perspective of the Farrer hypothesis a view that posits that Mark was written first that Matthew used Mark as a source and that Luke used both Mark and Matthew All of the articles in the volume are written in support of the Farrer hypothesis with the exception of the final chapter which criticizes these articles from the perspective of the reigning Two Source theory The contributors engage the synoptic problem with a more refined understanding of the options set before each of the evangelists pointing towards a deepened understanding of how works were compiled in the first and early second centuries CE The contributors include Andris Abakuks Stephen Carlson Eric Eve Mark Goodacre Heather Gorman John S Kloppenborg David Landry Mark Matson Ken Olson Michael Pahl Jeffrey Peterson and John C Poirier

Monthly Weather Review ,1990 *Equity and Efficiency Considerations of Public Higher Education* Salvatore Barbaro, 2005-12-16 It has become part of the conventional wisdom in the economics of education that subsidies to higher education have a regressive distributional effect Given that relatively more children from wealthier families enroll in higher education many economist assume that these subsidies to higher education have an unwanted distributional impact This volume presents new empirical evidence for the cross sectional point of view and provides an analytical framework for the longitudinal perspective The present volume also analyzes the equity and efficiency effects of widely discussed funding reforms and proposes a voluntary graduate tax *Hidden Markov and Other Models for Discrete- valued Time Series* Iain L. MacDonald, Walter Zucchini, 1997-01-01 Discrete valued time series are common in practice but methods for their analysis are not well known In recent years methods have been developed which are specifically designed for the analysis of discrete valued time series Hidden Markov and Other Models for Discrete Valued Time Series introduces a new versatile and computationally tractable class of models the hidden Markov models It presents a detailed account of these models then applies them to data from a wide range of diverse subject areas including medicine climatology and geophysics This book will be invaluable to researchers and postgraduate and senior undergraduate students in statistics Researchers and applied statisticians who analyze time series data in medicine animal behavior hydrology and sociology will also find this information useful

International Encyclopedia of Statistical Science Miodrag Lovric, 2025-06-19 The International Encyclopedia of Statistical Science stands as a monumental effort to enrich statistics education globally particularly in regions facing educational challenges By amalgamating the expertise of over 700 authors from 110 countries including Nobel Laureates and presidents of statistical societies it offers an unparalleled resource for readers worldwide This encyclopedia is not just a collection of entries it is a concerted effort to revive statistics as a vibrant critical field of study and application Providing a comprehensive and accessible account of statistical terms methods and applications it enables readers to gain a quick insight into the subject regardless of their background This work serves to refresh and expand the knowledge of researchers
