Whooping Crane Images From The Wild:

Whooping Crane Klaus Nigge,2010-08-16 Approximately 250 wild whooping cranes nest in northern Canada and winter in south Texas flying 2 500 miles annually between these two distinct havens the coastal marshes of the Gulf of Mexico and the boreal wilderness on the border of Alberta and the Northwest Territories Through twists of good fortune each of these terminal migratory places is protected from human encroachment by a U S national wildlife refuge on the one hand and a Canadian national park on the other This last remaining natural flock of the species its numbers small but slowly increasing has thus become known by the names of its sanctuaries Aransas Wood Buffalo On the flock s wintering grounds at Aransas National Wildlife Refuge in Texas photographer Klaus Nigge has captured the daily activity of a single family over several weeks in two separate years documenting their life in the salt marshes of the central Texas coast and in one year the happy arrival from the north of twin adolescents itself an unusual event Then with the backing of National Geographic magazine he received unprecedented permission from the Canadian government to photograph the cranes summer nesting sites in remote areas of Wood Buffalo National Park To obtain these unique photographs he sat in a cleverly constructed blind for six days and nights watching as a chick hatched and the adults cared for their young There he witnessed both the peace and the perils of the cranes summer haven In three galleries each containing portfolios of images of these magnificent birds in their natural habitat Nigge captures the beauty and essential mystery that have led humans the world over to include cranes in their earliest myths and legends Additionally Nigge has written vignettes to accompany each of the portfolios Krista Schlyer provides an introductory text that affords an overview of crane history She chronicles the monumental efforts by humans to ensure the survival of the species and has added a profile of Nigge outlining his extraordinary entry into the world of wild whooping cranes in order to acquire these breathtaking photographs *Birds in Trouble* Lynn E. Barber,2016-04-01 As oil was washing up on the shores of Louisiana covering shorebirds and their nests and eggs after the Deepwater Horizon disaster Lynn Barber decided to write this book to heighten awareness not only of the plight of bird species that are declining in numbers every year but also of the ways in which the birds we see every day may also face the same fate First explaining the idea of birds in trouble and what that means in terms of population conservation status and national and international designations the book then turns to the habitats that are important to birds how they are affected by changes in these habitats and what ordinary people can do to help counter those negative effects Barber then profiles forty two species that are in trouble in the United States discussing the likely reasons why and what if anything we can do to improve their situations Illustrated throughout with the author s signature bird art the book closes with a reminder about what we can do to ensure that the birds we see every day in our yards parks and communities will remain with us **Stalking the Vesper Bluets: Photographs by Stephen Cresswell** ,2006-05 *Stalking the Vesper Bluets* is a collection of color photographs by nature photographer Stephen Cresswell Included are fifty brief essays on topics ranging from male camaraderie among
