Whose Public Space International Case Studies In Urban Design And Development:

Whose Public Space? Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders [The Urban Design Reader](#) Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional

practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter *Public Space and the Challenges of Urban Transformation in Europe* Ali Madanipour, Sabine Knierbein, Aglaée Degros, 2013-11-20 European cities are changing rapidly in part due to the process of de industrialization European integration and economic globalization Within those cities public spaces are the meeting place of politics and culture social and individual territories instrumental and expressive concerns *Public Space and the Challenges of Urban Transformation in Europe* investigates how European city authorities understand and deal with their public spaces how this interacts with market forces social norms and cultural expectations whether and how this relates to the needs and experiences of their citizens exploring new strategies and innovative practices for strengthening public spaces and urban culture These questions are explored by looking at 13 case studies from across Europe written by active scholars in the area of public space and organized in three parts strategies plans and policies multiple roles of public space and everyday life in the city This book is essential reading for students and scholars interested in the design and development of public space The European case studies provide interesting examples and comparisons of how cities deal with their public space and issues of space and society *Public Space Reader* Miodrag Mitrašinić, Vikas Mehta, 2021-03-30 Recent global appropriations of public spaces through urban activism public uprising and political protest

have brought back democratic values beliefs and practices that have been historically associated with cities Given the aggressive commodification of public resources public space is critically important due to its capacity to enable forms of public discourse and social practice which are fundamental for the well being of democratic societies Public Space Reader brings together public space scholarship by a cross disciplinary group of academics and specialists whose essays consider fundamental questions What is public space and how does it manifest larger cultural social and political processes How are public spaces designed socially and materially produced and managed How does this impact the nature and character of public experience What roles does it play in the struggles for the just city and the Right to The City What critical participatory approaches can be employed to create inclusive public spaces that respond to the diverse needs desires and aspirations of individuals and communities alike What are the critical global and comparative perspectives on public space that can enable further scholarly and professional work And what are the futures of public space in the face of global pandemics such as COVID 19 The readers of this volume will be rewarded with an impressive array of perspectives that are bound to expand critical understanding of public space

Urban Space: experiences and Reflections from the Global South Hernández García, Jaime, Cárdenas-O'Byrne, Sabina, García Jerez, Adolfo, BB Beza, 2018-12-14 The structuring of Urban Space is as topical as ever in this era of climate change hyper urbanisation post digital labour markets and geo political power shifts Scholarship of the contemporary urban condition is dominated by studies and examples drawn from the global north Yet cities of the global south are distinctive from those of the global north Socio political conditions structure patterns and practices of urban reproduction and in turn Urban Space reflects conditions in the Global South The result is different space related outcomes This is the central topic of this collection In this book a unique collection of case study based accounts posits both English and Spanish academic literature to interpret and reinterpret the appropriation negotiation and reconfiguration of Urban Space in cities from Colombia to Namibia This collection will be of particular interest to urban scholars and others interested in contemporary urban change especially those with an interest in the Global South Readers will encounter new perspectives on the State's enduring influence in urban land and territory reconfiguration and the contrasting wider rhetoric that affords and legitimises a key role for the private sector The case studies also illuminate opportunities and possibilities for grassroots organising to challenge prevailing city actor hierarchies They also highlight the political economic consequences of particular cases of bus rapid transport projects for spatial and social segregation Across these and other topics recurring themes of inequality governance and environment are investigated in contested urban terrains The result is a unique collection of viewpoints with a common critical narrative on the present and future challenges facing cities of the Global South

Reframing the Role of Public Open Space Miriam Bodino, 2022-02-26 This book explores the growing spatial inequality in contemporary cities and the opportunity of reframing the role of public open space as a tool of inclusion in a context of an increasing economic gap between the urban poor and rich The first part outlines the

geographical and theoretical frames of reference which are then tested in the analysis of a case study Cape Town This city in South Africa was selected since its spatial aspects of separation are particularly evident due to the legacy of both apartheid and modernism The examination of the policies of the City of Cape Town confirms the rising attention to public space since the 1990s This slow progress of desegregation is tested through a critical study of one of the most disadvantaged areas of the city Khayelitsha The book explores the relevance and impact of an urban design project and reframes the role of public open space not only as a tool for restructuring the apartheid city but also for reinterpreting other fragmented contemporary cities

Ethics, Design and Planning of the Built Environment Claudia Basta,Stefano Moroni,2013-06-24 The book proposes a set of original contributions in research areas shared by planning theory architectural research design and ethical inquiry The contributors gathered in 2010 at the Ethics of the Built Environment seminar organized by the editors at Delft University of Technology Both prominent and emerging scholars presented their researches in the areas of aesthetics technological risks planning theory and architecture The scope of the seminar was highlighting shared lines of ethical inquiry among the themes discussed in order to identify perspectives of innovative interdisciplinary research After the seminar all seminar participants have elaborated their proposed contributions Some of the most prominent international authors in the field were subsequently invited to join in with this inquiry Claudia Basta teaches Network Infrastructures and Mobility at Wageningen University Between 2009 and 2011 she worked as Coordinator of the 3TU Centre of Excellence for Ethics and Technology of Delft University where she completed her post doc research on the shared areas of investigation between risk theories planning theories and ethical inquiry Her main research interests concern the matter of assessing and governing technological risks in relation to sustainable land use planning She wrote a number of journal articles and contributions to collective books on these themes Stefano Moroni teaches Land use ethics and the law at Milan Politecnico His main research interests concern planning theory and ethics He is the author of a number of books and journal articles Recent publications as co author Contractual Communities in the Self Organizing City Springer 2012 **Urban Design International** ,1985

American Book Publishing Record ,2003 Traditional Dwellings and Settlements Review ,2005 **China Review International** ,2002 **International Architecture Centres** Hannah Ford,Bridget Sawyers,2003-05-07 This is a guide to the network of architecture centres established in the UK Europe and North America It features information about the network of centres and serves to define the role of architectural centres in contributing to ongoing debate on urban renaissance Source other than Library of Congress **The Evolution of American Urban Design** David Gosling,Maria-Cristina Gosling,2003 This volume is the culmination of a lifetime s research and practice It offers a comprehensive survey of American urban design beginning with an account of its origins from the 17th to the early 20th centuries and continuing with a decade by decade analysis of developments from the 1950s to the present The author s far reaching examination extends beyond architectural and planning issues to a wider picture of the times and he sets the

development of urban planning theory and practice in the context of the cultural shifts that shaped them From shopping malls to utopian settlements and from the modification of existing cities to the creation of entire new towns every type of urban design project is covered The influence of leading figures is examined including Gyorgy Kepes Frank Lloyd Wright Kevin Lynch Philip Thiel Christopher Alexander Peter Calthorpe Robert Venturi Bernard Tschumi Rem Koolhaas Peter Eisenman Joel Garreau John Lang and many others who have made significant contributions to theory and practice
