Why Love Matters How Affection Shapes A Babys Brain:

Why Love Matters Sue Gerhardt, 2004-06-24 *Why Love Matters* explains why love is essential to brain development in the early years of life particularly to the development of our social and emotional brain systems and presents the startling discoveries that provide the answers to how our emotional lives work Sue Gerhardt considers how the earliest relationship shapes the baby's nervous system with lasting consequences and how our adult life is influenced by infancy despite our inability to remember babyhood She shows how the development of the brain can affect future emotional well being and goes on to look at specific early pathways that can affect the way we respond to stress and lead to conditions such as anorexia addiction and anti social behaviour *Why Love Matters* is a lively and very accessible interpretation of the latest findings in neuroscience psychology psychoanalysis and biochemistry It will be invaluable to psychotherapists and psychoanalysts mental health professionals parents and all those concerned with the central importance of brain development in relation to many later adult difficulties

Why Love Matters Sue Gerhardt, 2014-10-24 *Why Love Matters* explains why loving relationships are essential to brain development in the early years and how these early interactions can have lasting consequences for future emotional and physical health This second edition follows on from the success of the first updating the scientific research covering recent findings in genetics and the mind body connection and including a new chapter highlighting our growing understanding of the part also played by pregnancy in shaping a baby's future emotional and physical well being The author focuses in particular on the wide ranging effects of early stress on a baby or toddler's developing nervous system When things go wrong with relationships in early life the dependent child has to adapt what we now know is that his or her brain adapts too The brain's emotion and immune systems are particularly affected by early stress and can become less effective This makes the child more vulnerable to a range of later difficulties such as depression anti social behaviour addictions or anorexia as well as physical illness

No Child Left Different Sharna Olfman,2006-01-30 A stellar group of authors from across disciplines explains the alarming increase in the use of psychotropic medications questions the causes and presents disturbing thoughts regarding this phenomenon and the risks it creates for children They take an in depth look at the conditions that have led to drugging our children and stress how emotional social cultural and physical environments can both damage and heal young minds And

they challenge the model that maintains that psychological disturbance is genetic and thus requires medication This is riveting reading for all who care about the youngest members of society Over the past 15 years there has been a 300 percent increase in the use of psychotropic medications with girls and boys under the age of 20 and prescriptions for preschoolers have skyrocketed A stellar group of authors from across disciplines explains this increase questions the causes and presents disturbing thoughts regarding this phenomenon as they describe the risks it creates for children While there are certainly extreme cases where drugs are the only option medication rather than psychotherapy and counseling has become the first choice for treatment rather than a last resort The experts who joined forces for this book take an in depth look at the conditions that have led to drugging our children and stress how emotional social cultural and physical environments can both damage and heal young minds The so called medical model one maintaining that psychological disturbance is genetic and thus requires medication is challenged in this volume Contributors range from a pediatrician who has testified before Congress and been featured in a Time magazine cover story to a top child psychiatrist who is an official for the American Academy of Child and Adolescent Psychiatry along with a well known child psychiatrist psychologists environmentalists and a public policy consultant This is riveting reading for all who care about the youngest members of society Among other issues this work looks at controversy over whether psychiatric medications are safe or effective for children and what little we know about their effect on still developing brains as well as the role of corporate interests in the increased use of psychotropics for children Chapters address the role of environment in both causing and curing disorders more and more often diagnosed in our youngsters from ADHD depression and anxiety to eating disorders The core questions addressed by this sage group of contributors are these Why are so many children being diagnosed with psychiatric disturbances and given drugs Why have drugs become the first treatment of choice to deal with those disorders

Love and Midwifery Diane Ménage,Jenny Patterson,2025-05-13 This unique book argues that love underpins safe effective and high quality midwifery care and enables readers to explore sustainable and compassionate ways to engage with their profession At a time when midwives are struggling to stay connected with the passion that brought them into the profession and fear distress and trauma are prevalent within maternity care for both staff and those receiving care this book maps a new way forward It encourages reflection and discussion about how love impacts midwives experience of their practice and improves the quality of care they are able to provide for women and their families It develops a theoretical basis for understanding why love is relevant to midwifery how midwives think of love and the ways that it is communicated in practice It offers practical ways in which love can be appropriately nurtured and applied in contemporary maternity settings whilst upholding the professional standards required of all maternity care providers Many chapters include the authentic words of midwives reflecting on the role of love in their own practice experiences Love and Midwifery is a valuable contribution to the literature around compassion kindness resilience moral distress and trauma in maternity care helping midwives to realise and feel proud of the love in their work It

is an essential read for all midwives from student to experienced practitioner as well as the wider maternity care workforce

Love and the Politics of Care Stanislava Dikova, Wendy McMahon, Jordan Savage, 2022-11-03 This edited volume offers a contemporary rethinking of the relationship between love and care in the context of neoliberal practices of professionalization and work Each of the book's three sections interrogates a particular site of care where the affective political legal and economic dimensions of care intersect in challenging ways These sites are located within a variety of institutionally managed contexts such as the contemporary university the theatre hall the prison complex the family home the urban landscape and the care industry The geographical spread of the case studies stretches across India Vietnam Sweden Brazil South Africa the UK and the US and provides broad coverage that crosses the divide between the Global North and the Global South To address this transnational interdisciplinary field of study the collection utilises insights from across the humanities and social sciences and includes contributions from literature sociology cultural and media studies philosophy feminist theory theatre art history and education These inquiries build on a variety of conceptual tools and research methods from data analysis to psychoanalytic reading Love and the Politics of Care delivers an attentive and widely relevant examination of the politics of care and makes a compelling case for an urgent reconsideration of the methods that currently structure and regulate it
