Why Sex Matters A Darwinian Look At Human Behavior:

Why Sex Matters Bobbi S. Low, 2015-01-04 Why are men like other primate males usually the aggressors and risk takers Why do women typically have fewer sexual partners In Why Sex Matters Bobbi Low ranges from ancient Rome to modern America from the Amazon to the Arctic and from single celled organisms to international politics to show that these and many other questions about human behavior largely come down to evolution and sex More precisely as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so but that sometimes cooperation and collaboration are the most effective ways to succeed This newly revised edition has been thoroughly updated to include the latest research and reflect exciting changes in the field including how our evolutionary past continues to affect our ecological present

Why Sex Matters Bobbi S. Evolutionary Perspectives on Environmental Problems Iver Myrnes, 2017-07-05 The twenty first century presents an increasing number of environmental problems including toxic pollution global warming destruction of tropical forests extinction of biological diversity and depletion of natural resources These environmental problems are generally due to human behavior namely over consumption of resources and overpopulation Designing effective policies to address these problems requires a deep understanding of human behavior as well as ecology This in turn requires considerations of human nature and the evolutionary design of the human mind Evolutionary research on human behavior has profound implications for the environmental sciences The aim of this collection is to bring together a variety of chapters that show how and why

Part 1 Human Nature and Resource Conservation addresses environmental problems from different evolutionary perspectives Part 2 The Ecological Noble Savage Hypothesis examines the notion that our environmental problems are due to Western culture and that our ancestors and people in indigenous societies lived in harmony with nature until the corrupting influences of Western culture Part 3 The Tragedy of the Commons explores the conservation of common pool or open access natural resources such as fisheries forests grazing lands freshwater and clean air Part 4 The Evolution of Discounting and Conspicuous Consumption looks at the problem of explaining why people are so ecologically short sighted and why people in developed countries consume so many resources Part 5 Overpopulation and Fertility Declines addresses the evolution of human reproductive decisions Part 6 Biophilia aims to explain why people cherish nature as well as destroy it The goal of this volume is to introduce environmental thinkers to evolutionary perspectives on human behavior and the new interdisciplinary sciences of evolutionary psychology and behavioral ecology This reader aims to help bridge
