Area Access, Trails, and Transit Facilities ,2010 Traffic in Towns Colin Buchanan,2015-05-08 Traffic in Towns also known as the Buchanan Report is regarded as one of the most influential planning documents of the twentieth century The report reflected mounting concern about the impact on Britain s towns and cities of rapid growth in the ownership and use of motor vehicles Its purpose was to evaluate policy options for reducing the threat of traffic congestion to urban circulation and quality of life Two main conclusions were drawn from the report firstly the need for large scale reconstruction to make Britain s cities fit for the motor age including split level megastructures and urban motorways and secondly the simultaneous need to preserve parts of the city especially residential areas as car free zones or environmental areas In Britain successive governments drew back from implementing the full recommendations of the Study Group despite initial cross party support The prohibitive cost of city centre redevelopment and motorway construction meant a comprehensive solution to the problem of urban traffic on Buchanan lines was never attempted However local authorities in a variety of British cities such as Glasgow Leicester and Leeds took up aspects of the Report Internationally too the Report had a major impact in countries such as Sweden Italy and Australia In the longer term the influence of the Report may be best judged by the incremental changes it set in train such as pedestrianization of city centres traffic calming and other measures linked to Buchanan s concept of environmental areas In focusing attention on the effects of mass motorization on the urban environment Traffic in Towns set the terms of debate for a generation pre figuring recent discussion about the car and urban sustainability
