Interest, Private Property Anneke Smit, Marcia Valiante, 2015-12-15 At a time when pollution urban sprawl and condo booms are leading municipal governments to adopt prescriptive laws and regulations this book lays the groundwork for a more informed debate between those trying to preserve private property rights and those trying to assert public interests Rather than asking whether community interests should prevail over the rights of private property owners Public Interest Private Property delves into the heart of the argument to ask key questions Under what conditions should public interests take precedence And when they do in what manner should they be limited Drawing on case studies from across Canada the contributors examine the tensions surrounding expropriation smart growth tree bylaws green development and municipal water provision They also explore frustrations arising from the perceived loss of procedural rights in urban planning decision making the absence of a clear definition of public interest and the ambiguity surrounding the controls property owners have within a public planning system *Rural Wealth Creation* John L. Pender, Bruce A. Weber, Thomas G. Johnson, J. Matthew Fannin, 2014-06-05 This book investigates the role of wealth in achieving sustainable rural economic development The authors define wealth as all assets net of liabilities that can contribute to well being and they provide examples of many forms of capital physical financial human natural social and others They propose a conceptual framework for rural wealth

creation that considers how multiple forms of wealth provide opportunities for rural development and how development strategies affect the dynamics of wealth. They also provide a new accounting framework for measuring wealth stocks and flows. These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies. Rural Wealth Creation makes numerous contributions to research on sustainable rural development. Important distinctions are drawn to help guide wealth measurement such as the difference between the wealth located within a region and the wealth owned by residents of a region and privately owned versus publicly owned wealth. Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured. Several key hypotheses are proposed about the process of rural wealth creation and these are investigated by case study chapters assessing common rural development strategies such as promoting rural energy industries and amenity based development. Based on these case studies a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated. This book will be relevant to students, researchers and policy makers looking at rural community development, sustainable economic development and wealth measurement.

Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002.

A quiet revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who harvest them and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of NTFP policy and management specific to the United States, it brings together research from numerous disciplines and analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific

knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests **Land Tenure Center Newsletter** ,1998 **A Green and Permanent Land** Randal S. Beeman,James A. Pritchard,2001 Once patronized primarily by the counterculture and the health food establishment the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States As family farms failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture **A Green and Permanent Land** records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought **Fighting Over Land** Harvey Martin Jacobs,1999
