Whos Afraid Of The Multiverse:

Who's Afraid of the Multiverse? Jeffrey A. Zweerink, 2008 Who's Afraid of Deleuze and Guattari? Gregg Lambert, 2006-11-03 Deleuze and Guattari's landmark philosophical project *Capitalism and Schizophrenia* has been hailed as a highly original and sensational major philosophical work. The collaboration of two of the most remarkable and influential minds of the twentieth century, it is a project that still sets the terms of contemporary philosophical debate. It provides a radical and compelling analysis of social and cultural phenomena, offering fresh alternatives for thinking about history, society, capitalism, and culture. In *Who's Afraid of Deleuze and Guattari*, Gregg Lambert revisits this seminal work and re-evaluates Deleuze and Guattari's legacy in philosophy, literary criticism, and cultural studies. Since the early 1980s, Lambert offers the first detailed analysis of the reception of the *Capitalism and Schizophrenia* project by such key figures as Jameson, Žižek, Badiou, Hardt, Negri, and Agamben. He argues that the project has suffered from being underappreciated and too hastily dismissed on the one hand, and on the other, too quickly assimilated to the objectives of other desires, such as multiculturalism or American identity politics. In the light of the limitations of this reception history, Lambert offers a fresh evaluation of the project and its influences that promise to challenge the ways in which Deleuze and Guattari's controversial and remarkable project has been received. Divided into four key sections: Aesthetics, Psychoanalysis, Politics, and Power, *Who's Afraid of Deleuze and Guattari* offers a fresh, witty, and intelligent analysis of this major philosophical project.

Who's Afraid of the Unmoved Mover? Andrew I. Shephardson, 2019-02-12 Are postmodern philosophy and Christian theology compatible? A surprising number of Christian philosophers and theologians think so. However, these same thinkers argue that postmodern insights entail the rejection of natural theology, the ability to discover knowledge about the existence and nature of God in the natural world. Postmodernism, they claim, shows that appealing to nature to demonstrate or infer the existence of God is foolish, because these appeals rely on modernity's outmoded grounds for knowledge. Moreover, natural theology and apologetics are often hindrances to authentic Christian faith. Notions like objectivity and rationality are forms of idolatry from which Christians should repent. This book carefully examines the nature of truth, rationality, general revelation, and evangelism to show that the postmodern objections fail and that Christians ought to lovingly and faithfully use natural theology and apologetics to defend and commend the Christian faith to a world in need of the knowledge of God.

Worlds without End Mary-Jane Rubenstein, 2014-01-28 A religion professor elucidates the theory of the multiverse, its history, and its reception in science, philosophy, religion, and literature. Multiverse cosmologies imagine our universe as just one of a vast number of others. Beginning with ancient Atomist and Stoic philosophies, Mary-Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance. One concern is the so-called fine-tuning of the universe: nature's constants are so delicately calibrated that it seems they have been set just right to allow life to emerge. For some thinkers, these fine-tunings are evidence of the existence of God; for others, however, and for most

physicists God is an insufficient scientific explanation Hence the multiverse s allure if all possible worlds exist somewhere then like monkeys hammering out Shakespeare one universe is bound to be suitable for life Of course this hypothesis replaces God with an equally baffling article of faith the existence of universes beyond before or after our own eternally generated yet forever inaccessible to observation or experiment In their very efforts to sidestep metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein s witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers Publishers Weekly A fun mind stretching read clear and enlightening San Francisco Book Review

The Multiverse and Participatory

Metaphysics Jamie Boulding,2021-09-30 This book offers a new theological approach to the multiverse hypothesis With a distinctive methodology it shows that participatory metaphysics from ancient and medieval sources represents a fertile theological ground on which to grapple with contemporary ideas of the multiverse There are three key thinkers and themes discussed in the book Plato and cosmic multiplicity Aquinas and cosmic diversity and Nicholas of Cusa and cosmic infinity Their insights are brought into interaction with a diverse range of contemporary theological philosophical and scientific figures to demonstrate that a participatory account of the relationship between God and creation leads to a greater continuity between theology and the multiverse proposal in modern cosmology This is in contrast to existing work on the subject which often assumes that the two are in conflict By offering a fresh way to engage theologically with multiverse theory this book will be a unique resource for any scholar of Religion and Science Theology Metaphysics and Cosmology

God's Providence and Randomness in Nature Robert John Russell, Joshua M. Moritz, 2019-02-11 In October 2014 a group of mathematicians physicists ecologists philosophers and theologians gathered at a special conference in Berkeley California to present the results of a two year research program dubbed Project SATURN This program explored many rich avenues of thought at the intersection of modern science and Christian theology Chief among them is the possibility that specific processes might be so complex that they do not have sufficient physical causes Known as ontological indeterminism this idea has profound implications for theology Specifically it allows God to be thought of as acting providentially within nature without violating the laws and processes of nature Such a momentous insight could influence how we understand free will natural evil suffering in nature and the relation between divine providence and human evolution The essays collected here discussed these topics and were initially presented at the 2014 conference Part I establishes the scientific basis for conceptualizing specific processes in the universe as inherently

random and possibly indeterministic Part II discusses the philosophical and theological issues that spring from this understanding Together they represent the cutting edge of thought in the increasingly productive dialogue between science and theology Short for the Scientific and Theological Understandings of Randomness in Nature Project SATURN was created by the Center for Theology and the Natural Sciences a Program of the Graduate Theological Union Berkeley It was funded with a grant administered by Calvin College and provided by the John Templeton Foundation

Faith and Science Kenneth D. Keathley, 2024-09-15 In Faith and Science A Primer for a Supernatural World Kenneth Keathley argues that rather than acting as opposing forces scientific inquiry and the Christian faith go hand in hand In his mission to offer a fully integrated theology of science Keathley begins with the Lordship of Christ and the sufficiency of Scripture He characterizes the study of science as a providential gift and a worthy vocation with Christian origins Keathley then examines the twin challenges of scientism and fideism observing their deficiencies as comprehensive worldviews After defending Galileo as a scientist theologian Keathley offers readers a model for how to integrate their Christian faith with their scientific pursuits Faith and Science provides a ready primer for students and everyday Christians to challenge their preconceptions about faith and science and to develop a more robust worldview to guide their examinations of our supernatural world The Christ in Everything series exists to demonstrate how Christ is connected to all of life The primers in this series serve as introductions to important cultural topics including science freedom politics beauty and the nature of truth Each book offers a biblical and theological framework from which to view and approach the topic at hand followed by examples for how to walk in the way of Jesus in that cultural domain

Justified Faith without Reasons? Valentin Teodorescu, 2023-11-06 This study intends to show that the answer to the question whether faith can be justified without proofs can be resolved by importing ideas from S ren Kierkegaard s and Alvin

Plantinga's affirmative take on the matter. There is a deep similarity between the way they understand belief in God and belief in Christianity. The authors share the modern idea that there is an objective truth combining it with the postmodern stance that no method exists which would guarantee access to it. One can see at both authors not only a deep commonality of ideas but also a remarkable way in which their understandings augment each other. Whereas Kierkegaard comes to the provocative conclusion that if a person wants to live authentically she will meet Christ on her life's journey without needing any proof, Plantinga's inquiry contributes to the rational plausibility of this Justified Faith without Reasons project.

God's Crime Scene J. Warner Wallace, 2015-08-01 There are four ways to die and only one of them requires an intruder. Suicides, accidental and natural deaths can occur without any evidence from outside the room. But murders typically involve suspects external to the crime scene. If there's evidence of an outside intruder, homicide detectives have to prepare for a chase. Intruders turn death scenes into crime scenes. Join J. Warner Wallace, former atheist, seasoned cold case detective, and popular national speaker as he tackles his most important case with you on the jury. With the expertise of a cold case detective, J. Warner examines eight critical pieces of evidence in the crime scene of the universe to determine if they point to a Divine Intruder. If you have ever wondered if something or someone outside the natural realm created the universe and everything in it, this is the case for you.

Unbelievable? Justin Brierley, 2017-06-15 Conversations matter. Yet recently good conversations about faith have been increasingly squeezed out of the public sphere. Seeking to reopen the debate, Justin Brierley began to invite atheists and sceptics on to Premier Christian Radio to air arguments for and against the Christian faith. But how has ten years of discussion with atheists affected the presenter's faith? Reflecting on conversations with Richard Dawkins, Derren Brown, and many more, Justin explains why he still finds Christianity the most compelling explanation for life, the universe, and everything. And why, regardless of belief or background, we should all welcome the conversation. Beautifully written, brilliantly argued, Justin's book will thrill Christians and challenge atheists.

R. T. Kendall, author and pastor, Justin has that happy knack of being able to get people of diametrically opposed opinions debating the big issues. John Lennox, Professor of Mathematics, University of Oxford.

Extraterrestrials in the Catholic Imagination Jennifer Rosato, Alan Vincelette, 2021-02-10 What do scientists know about the possibility of life outside our solar system? How does Catholic science fiction imagine such worlds? What are the implications for Catholic thought? This collection brings together leading scientists, philosophers, theologians, and science fiction authors in the Catholic tradition to examine these issues. In the first section, Christian scientists detail the latest scientific findings regarding the possibility of life on exoplanets. The second part brings together leading Catholic science fiction authors who describe how alien life forms have been prevalent in the Catholic imagination from the Middle Ages right up to the present day. In the final section, Catholic philosophers and theologians examine the implications of discovering intelligent life elsewhere in the universe. Rather than worrying that the discovery of intelligent extraterrestrials might threaten the dignity of humans or their existence, the contributors here

maintain that such creatures should be welcomed as fellow creatures of God and potential subjects of divine salvation

Sexuality and Being in the Poststructuralist Universe of Clarice Lispector Earl E. Fitz, 2010-06-28 Driven by an unfulfilled desire for the unattainable ultimately indefinable Other the protagonists of the novels and stories of acclaimed Brazilian writer Clarice Lispector exemplify and humanize many of the issues central to poststructuralist thought from the nature of language truth and meaning to the unstable relationships between language being and reality In this book Earl Fitz demonstrates that in turn poststructuralism offers important and revealing insights into all aspects of Lispector's writing including her style sense of structure characters themes and socio political conscience Fitz draws on Lispector's entire oeuvre novels stories crônicas and children's literature to argue that her writing consistently reflects the basic tenets of poststructuralist theory He shows how Lispector's characters struggle over and humanize poststructuralist dilemmas and how their essential sense of being is deeply dependent on a shifting and typically transgressive sense of desire and sexuality
