Hendriks, 2017-07-03 In Life Advice from Below Eric C. Hendriks offers the first systematic comparative study of the globalization of American style self-help culture and the cultural conflicts this creates in different national contexts The self-help guru is an archetypal American figure associated with individualism materialism and the American Dream Nonetheless the self-help industry is spreading globally thriving in China and other seemingly unlikely places Controversy follows in its wake as the self-help industry operating outside of formal education and state institutions outflanks philosophical religious and political elites who have their own visions of the Good Life Through a comparison of Germany and China Hendriks analyzes how the competition between self-help gurus and institutional authorities unfolds under radically different politico-cultural regimes This witty book charms its way through a very serious sociology of the seriously quirky field of self-help books Read it for its fascinating pop culture insights and you'll come away with a deep understanding of contemporary sociological theory Highly recommended Salvatore Babones University of Sydney Hendriks finding that Germany rather than China is more resistant to self-help gurus offers a powerful corrective to the assumption in much of the globalization literature that the greatest cultural divide is between the Anglo-Western-European sphere and the rest of the globe Rodney
