Thought Thomas Lombardo, 2006-06-23 Contemporary Futurist Thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead There are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity Psychologist and futurist Tom Lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future The book begins with an in depth examination of the highly influential literary genre of science fiction which Dr Lombardo identifies as the mythology of the future He next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future Social and technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world Given the powerful and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise Where are we potentially heading and perhaps more importantly where should we be heading The final chapter provides an extensive review of different answers to these questions Describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future In the conclusion Dr Lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future This book completes the study of future consciousness begun in its companion volume The Evolution of Future Consciousness These two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future *Just Genes* Carol Isaacson Barash, 2007-12-30 Advances in genetics research largely though not entirely spawned by the Human Genome Project have led to a broad array of new technologies that promise to revolutionize life as we have known it Medicine and agriculture are already starting to utilize new technologies to greatly improve disease prevention and treatment and food production Yet these improvements often raise ethical questions that are not easy to untangle Some have gone as far to as to argue that certain applications such as embryonic stem cell research threaten the very fiber of our moral compass While the application of scientific advances to better humankind has always raised thorny ethical issues the ethical impact of genetic advances arguably reaches a new height because the applicability of advances is exceptionally broad deep and potentially irreversible To utilize such technologies could mean saving thousands of lives but where and how do we draw the line Here Barash sheds light on the actual ethical concerns surrounding various types of genetic technologies introducing readers to the competing issues at stake in the arguments about the scientific application of the new technologies available and those on the horizon She begins by illustrating the history of genetic advances their societal applications and the ethical issues that have arisen

from those applications Using case studies and examples throughout she walks readers through the various considerations involved in a variety of areas related to the application of genetic technologies currently available and possible in the future Covering topics ranging from stem cell research to genetically modified food genetic mapping to cloning this book offers a thoughtful approach to the complex issues at play in the various fields of genetic technologies **Privacy and Identity Management for Life** Simone Fischer-Hübner, Penny Duquenoy, Marit Hansen, Ronald Leenes, Ge Zhang, 2011-04-21 This book constitutes the thoroughly refereed post conference proceedings of the 6th IFIP WG 9.2.9.6.11.7.11.4.11.6 PrimeLife International Summer School held in Helsingborg Sweden in August 2010 The 27 revised papers were carefully selected from numerous submissions during two rounds of reviewing They are organized in topical sections on terminology privacy metrics ethical social and legal aspects data protection and identity management eID cards and eID interoperability emerging technologies privacy for eGovernment and AAL applications social networks and privacy privacy policies and usable privacy
