

Why Boys Fail— and What We Can Do About It

Patricia D. Hunsader

Boys will be boys, but that doesn't mean they can't learn to read as well as girls.

The story is the same but the players have changed. Instead of being bombarded with frightening statistics on the miseducation of girls in our public schools, we are now being told that boys have fallen so far behind girls that the very fabric of our society is in jeopardy. Is it just hype? The following indicators speak for themselves.

- Boys are given 70 percent of the Ds and Fs on school report cards (Mullrine 2001).
- Boys are 50 percent more likely to be retained than girls (Young & Brozo 2001).
- Boys are three to five times more likely than girls to be labeled as learning disabled (Young & Brozo 2001).
- Boys account for 71 percent of all school suspensions (Dobson 2001).
- Boys report substantially less positive schooling experiences in terms of enjoyment, usefulness of the curriculum, and teacher responsiveness (Rowe 2000).

THE MESSAGE

The author cites research to show that boys' literacy underachievement stems from inherent social and biological differences between girls and boys that tend to favor girls in the classroom. The article urges schools to recognize and consider boys' unique needs and learning styles in teaching literacy.

This is not a recent phenomenon. Research shows that as early as the late 1800s there was concern that boys were not doing as well as girls in school (Young & Brozo 2001). Over the years, a pattern has emerged in which boys' failures are blamed on factors external to the boys themselves, such as curricula, teachers, and teaching methods—all of which supposedly favor girls.

But this is not an adequate rationale for boys'

poor school performance. It's time to closely examine boys' unique needs and learning styles, and to consider how these may be affecting boys' school experience, particularly in regard to literacy.

The Trouble with Boys

There are many roots of underachievement by boys, the first of which is their social structure. Boys have a strong desire to be viewed as masculine by their peers, and this takes the form of thinking, talking, and acting in a way that they believe reflects masculinity. Unfortunately, one of the most prevalent beliefs among school-aged boys is that real boys don't work hard in school. Jackson (1998) found that even academically successful boys felt the need to hide their commitment to academic work in order to be accepted by their peers.

The second root of the problem is biological. According to studies by the University of Pennsylvania's Brain Behavior Laboratory, girls' brains are more finely developed, giving them superior verbal skills (Mullrine 2001). Unfortunately, the very things at which the male brain excels—gross motor skills, visual and spatial skills, and exuberance—are qualities that are not very useful in the classroom, where teaching and management tend to fit the temperament, learning styles, and natural
