Zeegeschiedenis van de Lage Landen Ph. M. Bosscher, 1975 **Zeegeschiedenis van de Lage Landen** Ph.M. Bosscher, 1975 **Defining the Holy** Sarah Hamilton, 2016-12-05 Holy sites both public churches monasteries shrines and more private domestic chapels oratories populated the landscape of medieval and early modern Europe providing contemporaries with access to the divine These sacred spaces thus defined religious experience and were fundamental to both the geography and social history of Europe over the course of 1 000 years But how were these sacred spaces both public and private defined How were they created used recognised and transformed And to what extent did these definitions change over the course of time and in particular as a result of the changes wrought in the sixteenth and seventeenth centuries Taking a strongly interdisciplinary approach this volume tackles these questions from the point of view of archaeology architectural and art history liturgy and history to consider the fundamental interaction between the sacred and the profane Exploring the establishment of sacred space within both the public and domestic spheres as well as the role of the secular within the sacred sphere each chapter provides fascinating insights into how these concepts helped shape and were shaped by wider society By highlighting these issues on a European basis from the medieval period through the age of the reformation these essays demonstrate the significance of continuity as much as change in definitions of sacred space and thus identify long term trends which have hitherto been absent in more limited studies As such this volume provides essential reading for anyone with an interest in the ecclesiastical development of western Europe from the thirteenth to the eighteenth centuries Mededelingen van de Nederlandse Vereniging voor Zeegeschiedenis Nederlandse Vereniging voor Zeegeschiedenis, 1999 *Geschiedenis der Lage Landen : [catalogus]* Martinus Nijhoff Publishers, 1977 Nederlandsch letterkundig nieuwsblad , 1978 Nicolaes Witsen and Shipbuilding in the Dutch Golden Age A. J. Hoving, Diederick Wildeman, 2012-03-29 In 1671 Dutch diplomat and scientist Nicolaes Witsen published a book that served among other things as an encyclopedia for the shipbuilding first method of ship construction In the centuries since Witsen's rather convoluted text has also become a valuable source for insights into historical shipbuilding methods and philosophies during the Golden Age of Dutch maritime trade However as Andr Wegener Sleeswyk's foreword notes Witsen's work is difficult to access not only for its seventeenth century Dutch language but also for the vagaries of its author's presentation Fortunately for scholars and students of nautical archaeology and shipbuilding this important but chaotic work has now been reorganized and elucidated by A J Hoving and translated into English by Alan Lemmers In Nicolaes Witsen and Shipbuilding in the Dutch Golden Age Hoving master model builder for the Rijksmuseum in Amsterdam sorts out the steps in Witsen's method for building a seventeenth century pinas by following them and building a model of the vessel Experimenting with techniques and materials conducting research in other publications of the time and rewriting as needed to clarify and correct some vital omissions in the sequence Hoving makes Witsen's work easier to use and understand Nicolaes Witsen and Shipbuilding in the Dutch

Golden Age is an indispensable guide to Witsen's work and the world of his topic the almost forgotten basics of a craftsmanship that has been credited with the flourishing of the Dutch Republic in the seventeenth century To view a sample of Ab Hoving's ship model drawings please visit <http://nautarch.tamu.edu/shiplab/AbHoving.htm>
