Zen Nature Tushita Art, 2011-08-01 *Handbook of Ethical Foundations of Mindfulness* Steven Stanley, Ronald E. Purser, Nirbhay N. Singh, 2018-07-20 This handbook explores the multifaceted ethical dimensions of mindfulness from early Buddhist sources to present day Western interpretations of mindfulness. It takes a modern ethical approach to the study of mindfulness and traces contemporary mindfulness practice from solitary journey to the global whole. Noted practitioners, teachers, scholars, and other professionals lend diverse perspectives to the debate over the moral content of mindfulness and its status as religious, secular, or post secular practice. Chapters offer new views on the roots of mindfulness in Buddhist moral teachings, ethical mindfulness in interpersonal relationships, and the necessity of ethics in mindfulness based education and therapy. Chapters also discuss current debates concerning the ethics of mindfulness across the applied fields of education and pedagogy, business, economics, and the environment. Topics featured in this handbook include: Mindfulness as the true foundation of a naturally ethical life; Mindfulness and its impact on emotional life, interpersonal relationships, and forgiveness; How Buddhist ethics informs spiritual practice across the three main vehicles (yanas) of Buddhism and its relation to mindfulness; Mindfulness or the mass marketization and commodification of mindfulness based interventions (MBIs); How an ethic of interdependence formed by Buddhist principles and mindfulness practices can help address the environmental crisis. The *Handbook of Ethical Foundations of Mindfulness* is a must have resource for researchers, clinicians, professionals, and graduate students in psychology, complementary and alternative medicine, and social work, as well as occupational and rehabilitation therapy, nursing, philosophy, business management, and teachers of Buddhism and meditation. College Mindfulness Training Kevin Page, 2019-02-14 *College Mindfulness Training* is a ground breaking book that carefully combines selected meditation exercises with guidance explaining the background, scientific context, and practical applications of mindfulness practice. More than just a meditation manual, this book details how and why personal mindfulness practice is essential for the college aged student. In addition to extensive practical exercises for both beginner and intermediate level meditation students, the author explores the kinds of institutions and organizations that have arisen out of the popular mindfulness movement and what career options in the field may be available in the future. Throughout the manual, the author provides readers with insights into basic meditation techniques, active and passive meditation techniques, Focused Attention Meditation in both guided and self guided forms, Open Monitoring Meditation, informal meditation exercises, a brief history of the MBSR program, and Koru meditation, a survey of current apps and meditation supportive technology platforms, and detailed instructions for self driven practice and a semester long outline for teachers. Love Letter to the Earth Thich Nhat Hanh, 2013-06-17 World renowned Zen monk Thich Nhat Hanh champions a more mindful spiritual approach to protecting nature and limiting climate change one that recognizes people and planet as one and the same While many experts point to the enormous complexity in addressing issues ranging from the destruction of ecosystems to the loss of millions of species Thich Nhat Hanh identifies one key issue as having the potential to create a tipping point He believes that we need to move beyond the concept of the environment as it leads people to experience themselves and Earth as two separate entities and to see the planet only in terms of what it can do for them Here Thich Nhat Hanh points to the lack of meaning and connection in peoples lives as being the cause of our addiction to consumerism He deems it vital that we recognize and respond to the stress we are putting on the Earth if civilization is to survive Rejecting the conventional economic approach Thich Nhat Hanh shows that mindfulness and a spiritual revolution are needed to protect nature and limit climate change Love Letter to the Earth is a hopeful book that gives us a path to follow by showing that change is possible only with the recognition that people and the planet are ultimately one and the same
